Subject: Howard Student EJ - Brunch

All:

Last semester I offered up an auction item for the Howard Law Public Interest Law fundraising auction an "EJ brunch for two with Professor Simms and a few of his friends." The winning bidder is an outstanding student named [Ex. 6 - Personal Privacy] He is a third year student, and has taken several of the environmental law offerings. I would like to schedule a brunch with him, and am hoping that a few of you might join me (also feel free to invite others).

If you would be interested, please let me know, and I will work with works for him and for at least a few of us.

Very best to you all, Patrice.

-	HANGE OF MEETING TIME FOR 2014 GOLDMAN PRIZE WINNER FOR AFRICA NOW
3.30PM MA	. 2

Hi Everybody

Sorry but we have to move the time back for this meeting. The Goldman folks asked me to change the time for 3.30pm here at our offices on May 2. Sorry for any inconvenience. To find out more about the Goldman Prize check out the website: www.goldmanprize.org

On Mon, Apr 14, 2014 at 5:28 PM, Leslie Fields < leslie.fields@sierraclub.org > wrote:

Dear Friends

I hope you're enjoying our Spring! The Goldman Prize Foundation informed me that this year's winner for Africa would like to meet local EJ folks while he is in town for the ceremony. So I'm putting together a meeting for him (all the winners' names are embargoed until late April). So you are cordially invited to meet this outstanding activist from the Continent, to share fellowship and strategies, here at the Sierra Club (address below) from 2-4pm on May 2.

Please rsvp and feel free to invite others, especially interns and students but please send me the names. Thanks, Leslie

Terry McGuire Washington Representative Sierra Club 202-495-3045

United States Senate

WASHINGTON, DC 20510

April 21, 2016

Administrator Gina McCarthy U.S. Environmental Protection Agency 1200 Pennsylvania Avenue N.W. Washington, DC 20004

Dear Administrator McCarthy,

We write to express great concern about the State of Michigan's failure to submit an Implementation Plan to address sulfur dioxide emissions in Wayne County, MI. Given the threats to public health from continued noncompliance with national air quality standards, it is critical that EPA require an effective Implementation Plan as soon as possible—the Michigan Department of Environmental Quality (MDEQ) plan is already well past due. If MDEQ fails to finalize an effective Implementation Plan over the next 60 days, we would urge the EPA to pursue a Federal Implementation Plan. A strong sense of urgency is needed to reduce sulfur dioxide levels and other air pollution in Wayne County in order to improve the health of Michigan residents.

As you know, in July 2013 a portion of Wayne County was designated as having sulfur dioxide levels above National Ambient Air Quality Standards. The state was required to submit their plan to the EPA by April 2015. MDEQ released a draft Implementation Plan in August 2015, but the plan did little to demonstrate how this non-attainment area would meet national air quality standards. On March 10, 2016, the Environmental Protection Agency (EPA) issued a finding of Michigan's failure to submit an Implementation Plan. Residents of Wayne County simply cannot afford to wait for the process to drag on any longer.

Detroit and Wayne County residents are at risk of exposure to high levels of sulfur dioxide, which is well documented to cause significant respiratory and cardiovascular problems. Asthmatics are particularly sensitive to exposure to high levels of sulfur dioxide. The rate of asthma hospitalization for Detroit residents is three times higher than that of Michigan as a whole. This burden is disproportionately placed on children. In Detroit, asthma is the largest single cause of student absenteeism.

The EPA should ensure that a strong and effective Implementation Plan to meet national air quality standards in Wayne County is in place as soon as possible. In light of continued delays, as well as a lack of action in responding to the Flint water emergency, we are concerned that the MDEQ is not fully committed to this process. If the EPA finds that the State and private stakeholders are unable to work expeditiously enough to develop an effective plan by the end of spring, we urge you to move forward with a Federal Implementation Plan that protects the health and well-being of the people of Wayne County.

Sincerely,

Gary C. Peters

April 19, 2016

Re: Protection of the Public Health from Sulfur Dioxide Pollution

Dear Administrator McCarthy,

The Sierra Club requests a meeting with you to address the need for EPA to issue federal implementation plans (FIPs) for areas failing to attain the sulfur dioxide (SO₂) national ambient air quality standard (NAAQS), and to issue modeling-based area designations for polluted regions now deemed unclassified. We are extremely concerned about EPA's slow pace in implementing the life-saving NAAQS. As you know, based on careful scientific studies demonstrating the severe respiratory health impacts from even short-term exposure to SO₂, the standard—once implemented—will save thousands of lives every year. But despite being issued in 2010, and despite EPA originally intending that the entire country would attain the standard by 2017, huge numbers of people are living in areas with bad air quality, and very little progress is being made.

EPA has two clear options before it to ensure that, despite the delays in implementation, EPA is able deliver the public health benefits of the sulfur dioxide standard. First, EPA must commit to issuing FIPs for the areas with dangerous levels of sulfur dioxide where the states have not acted. Particularly in places like Detroit, the combination of state inaction and EPA delay is putting lives at risk. Second, EPA must move forward with identifying and designating additional nonattainment areas, based on the information before the agency, including modeling information submitted by environmental and public health groups.

EPA Should Issues Federal Plans for Nonattainment Areas

EPA should move forward immediately to develop and issue FIPs for existing nonattainment areas. States are long overdue in creating required plans to fix their air quality. In fact, as EPA just acknowledged, *eleven* states have completely failed to submit any plan to address the unsafe levels of sulfur dioxide within their borders and afflicting their residents. These states—Michigan, Iowa, Kentucky, Pennsylvania, West Virginia, Tennessee, Ohio, Louisiana, Montana, New Hampshire, and Arizona—were

supposed to submit plans last April as to how they plan to fix their air quality problems, but they did not. Although EPA could have issued a finding of failure to comply when the states missed their deadline, it did not. Almost one year later, EPA has made its finding that states have failed to submit plans. Now it is imperative that the agency act immediately to protect the public health by issuing FIPs. EPA must not compound the prior missed deadlines by waiting to issue FIPs. In places like Detroit and many other cities, the air is unsafe, the state is not taking steps to address the problem, and EPA must use its authority to compel a cleanup of large sulfur dioxide polluters.

EPA Should Issue Modeling-Based Area Designations

Because the timeline for states to repair failing air quality is keyed to when EPA issues a nonattainment designation, it is critical that EPA move forward with issuing modeling-based area designations. EPA finalized the sulfur dioxide NAAQS in June of 2010, and the the Clean Air Act, contemplates that the agency would identify areas violating that standard by June of 2012. However, in 2012, EPA gave itself an extra year, and extended its deadline until June of 2013.

EPA did not meet the extended 2013 deadline. In August of 2013, EPA identified 29 areas in 16 states with dangerous levels of sulfur dioxide, but left the rest of the country undesignated. Sierra Club, NRDC, and multiple states filed lawsuits against EPA for failing to meet its designations deadline. Ultimately, EPA was able to reach a consent decree with Sierra Club and NRDC, placing EPA on a timeline to finalize designations in three waves: in July of 2016, in December of 2017, and in December of 2020. We urge EPA to move forward with modeling-based designations in July, and strongly signal to states that the majority of remaining designations should be modeling-based and occur in 2017. This would ensure that the public experiences timely progress in cleaning up sulfur dioxide pollution.

The Sierra Club would like to discuss with you how EPA can get the sulfur dioxide NAAQS implementation process back on track, to save or improve the lives of many thousands of people. At your earliest possible convenience, we would appreciate a meeting to discuss positive steps forward.

Sincerely,

Michael Brune

	This Friday! Meet our Goldman Prize Winners	
To: Lesli	ie Fields < leslie.fields@sierraclub.org>	
Prize recip	pients now revealed! RSVP today.	No Images? Click here

Join us in celebration as the Sierra Club and Global Alliance for Incinerator Alternatives (GAIA) proudly host Goldman Prize winners Destiny Watford and Luis Jorge Rivera Herrera. Over lunch, we'll toast to their

achievements as they share their work fighting for equitable, sustainable development.

Friday, April 22 12:30 pm - 2:00 pm Sierra Club Office 50 F St. NW, 8th Floor | Washington, D.C.

Lunch will be provided.

We invite you to meet two recipients of this year's prestigious <u>Goldman Environmental Prize</u>. Luis Jorge Rivera Herrera, nominated for the award by the Sierra Club, and Destiny Watford, nominated by the Maryland-based human rights organization, United Workers, both have compelling stories to share with you. Luis has worked to preserve and protect Puerto Rico's rich ecosystem, and Destiny has called out systemic poverty and human rights violations while battling against trash burning incinerators.

Both honorees are helping bring forth a new vision for sustainable and equitable development. Learn about their tremendous efforts, what remains to be done, and how you can help.

We hope you will join us for an inspiring conversation between two leaders with facilitation by GAIA.

For more information or to RSVP by April 21, contact Sara Harvey: sara.harvey@sierraclub.org or 202-548-6587.

In a community whose environmental rights had long been sidelined to make room for heavy industry, **Destiny Watford** inspired residents of a Baltimore neighborhood to defeat plans to build the nation's largest incinerator less than a mile away from her high school.

Luis Jorge Rivera Herrera helped lead a successful campaign to establish a nature reserve in Puerto Rico's Northeast Ecological Corridor—an important nesting ground for the endangered leatherback sea turtle—and protect the island's natural heritage from harmful development.

Subject: This Friday! Meet our Goldman Prize Winners

To: Leslie Fields < leslie.fields@sierraclub.org>

Join us in celebration as the Sierra Club and Global Alliance for Incinerator Alternatives (GAIA) proudly host Goldman Prize winners Destiny Watford and Luis Jorge Rivera Herrera. Over lunch, we'll toast to their achievements as they share their work fighting for equitable, sustainable development.

Friday, April 22 12:30 pm - 2:00 pm Sierra Club Office 50 F St. NW, 8th Floor | Washington, D.C.

Lunch will be provided.

We invite you to meet two recipients of this year's prestigious <u>Goldman Environmental Prize</u>. Luis Jorge Rivera Herrera, nominated for the award by the Sierra Club, and Destiny Watford, nominated by the Maryland-based human rights organization, United Workers, both have compelling stories to share with you. Luis has worked to preserve and protect Puerto Rico's rich ecosystem, and Destiny has called out systemic poverty and human rights violations while battling against trash burning incinerators.

Both honorees are helping bring forth a new vision for sustainable and equitable development. Learn about their tremendous efforts, what remains to be done, and how you can help.

We hope you will join us for an inspiring conversation between two leaders with facilitation by GAIA.

For more information or to RSVP by April 21, contact Sara Harvey: sara.harvey@sierraclub.org or 202-548-6587.

In a community whose environmental rights had long been sidelined to make room for heavy industry, **Destiny Watford** inspired residents of a Baltimore neighborhood to defeat plans to build the nation's largest incinerator less than a mile away from her high school.

Luis Jorge Rivera Herrera helped lead a successful campaign to establish a nature reserve in Puerto Rico's Northeast Ecological Corridor—an important nesting ground for the endangered leatherback sea turtle—and protect the island's natural heritage from harmful development.

The Sierra Club 85 2nd St., 2nd Floor | San Francisco, CA 94105 | (415) 977-5744 Regional office: 50 F St. NW | Washington, D.C. 20001 | (202) 548-6585

We want to stay in touch! If you'd rather be contacted at a different email address, simply reply to this message.

Subject: 2016 National Resources and Training Summit to Revitalize Vulnerable Communities on October 25-26, 2016 at the Crystal City Marriott, 1999 Jefferson Davis Highway, Arlington VA

Aaron,

I hope you are having a blessed week so far and the Summer went well. I wanted to send you a personal note to invite you to be a Keynote speaker and to update you on the upcoming **2016**National Resources and Training Summit to Revitalize Vulnerable Communities on October 25-26, 2016 at the Crystal City Marriott, 1999 Jefferson Davis Highway, Arlington VA 22202. The Multi-Stakeholder Summit currently has **24 Partners and 8 Sponsors**, representing a broad coalition of groups, organizations and networks focused on addressing the needs of our most vulnerable communities. The design of the Summit came out of over 75 conversations with leaders around the country.

The National Resources and Training Summit to Revitalize Vulnerable Communities will enhance collaboration around environmental, health and economic concerns (e.g., climate change, just transition workforce development, business entrepreneurship, financial institutional education, etc.) and ensure vulnerable populations have access to information, services, and data for increased resilience, engagement, and sustainability.

Objective: To partner with the federal family, communities, states, tribes, local government, business, industry, foundations, nongovernmental organizations, and academia to leverage available resources and expertise to help build healthy sustainable and economically thriving communities.

The Summit will also highlight resources, tools and techniques available to achieve sustainable success through its concurrent focused track sessions identified below.

- Just Transition Workforce Development Training
- Business Opportunities and Access to Financial Resources
- Health and Environmental Technical Training

A networking session and Eco-Café is planned for Tuesday, October 25 from 5:30 pm – 8:30

pm. The session will encompass a career fair, poster session, exhibits and resource vendors where you will be able to gather information, meet other experts in your field and share information

Unfortunately because of the size of our venue, we can only accommodate approximately 250 participants on site (our goal is to have 100 community leaders in attendance who will be given priority registration status).

In an effort to accommodate people unable to travel to physical venue, **selected portions** of the Training Summit will be simulcast from the venue for remote audience participation. Remote participants will be able to view, listen and ask questions from their desks!

To learn more about the Summit and register, please visit our website http://www.survivingtothrivingsummit.org/

Aaron If your schedule will allow, we would love to have you join us on the 25th. Thank you for all of the work that you and the Sierra club does on a daily basis to help our most vulnerable communities move from "Surviving to Thriving".... I look forward to your response – I can be reached at 202-564-2606.

For additional information on the Training Summit, please contact leads Ms. Holly Wilson (919-541-5624) Wilson.holly@epa.gov or Dr. Marva King (202-360-6053) king.marva@epa.gov.

Subject: Re: 2016 National Training and Resources Summit for Revitalizing Vulnerable

Communities

Where should people write or whom should they contact if they would need a scholarship?

I wonder who might sponsor community participants. It might be something to plan for next year — perhaps a foundation that funds racial justice work? I'll give it more thought.

Subject: 2016 National Training and Resources Summit for Revitalizing Vulnerable Communities

Marianne,

I wanted to personally make sure you knew about the 2016 National Training and Resources Summit for Revitalizing Vulnerable Communities on October 25th & 26th. This inaugural Summit is the first of its kind and specifically focused on identifying resources, technical assistance and economic opportunities for our communities...If you have any questions give me a buzz or email...

Please share the link with stakeholders who would benefit from participating in the Summit: http://www.survivingtothrivingsummit.org

Blessings Mustafa

Subject: FW: INVITATION: White House Champions of Change for Climate Equity

Event - July 15, 2016

Hi Mustafa – feel free to pass this invite on to anyone you think might want to attend. Thanks!

Friends,

You are invited to join White House officials for an event honoring the White House Champions of Change for Climate Equity on July 15th in Washington D.C. As part of The White House Champions of Change program, this event will feature a select group of Americans who are doing extraordinary things to empower and inspire their communities, including enabling low-income and underserved communities to prepare for, adapt to, and thrive in the face of climate change.

1011

Event Details:

-

What: Event to Honor the White House Champions of Change for Climate Equity

When: 2:30-5:00pm (ET), Friday, July 15, 2016

Where: South Court Auditorium - Eisenhower Executive Office Building - Washington D.C.

How: <u>Please RSVP here</u> [please RSVP by 5:00pm (ET), July 12]. Further details will be provided to those who RSVP.

Note: This invitation is intended for the direct recipient and is non-transferable without prior consent. If you have any questions, please email Events@CEQ.EOP.GOV.

We hope you will be able to join us to honor the amazing Champs!

All the best,

Mark Antoniewicz

Environmental Justice & Climate Justice Family,

I have been working diligently to increase the number of Agencies & Departments who have a responsibility for Environmental Justice. I have asked each of them to develop additional opportunities to engage with our communities and provide mechanisms for their experiences and expertise to play a stronger role in their strategic planning.

Subject: USDA Seeks Public Comment on 2016-2020 Environmental Justice Strategic Plan

Below is an excellent opportunity to share your comments with USDA on the development of

their **2016-2020 Environmental Justice Strategic Plan**. They have made some great strides over the last year and have become a very active and committed partner on the Environmental Justice Inter- Agency Working Group (EJIWG). Your ideas and expertise will help to ensure an even stronger focus on environmental justice over the next few years. I hope you will see value in commenting and sharing this information with your organizations and networks.

Many Blessings

Mustafa

USDA Seeks Public Comment on 2016-2020 Environmental Justice Strategic Plan

Comments are due by February 14, 2016

The U.S. Department of Agriculture (USDA) invites public comment on the draft update of the Department's Environmental Justice Strategic Plan. The four-year plan establishes goals to increase outreach and participation by historically underserved communities for the years 2016-2020 and outlines the ways each USDA agency plans to accomplish them.

"This revised environmental justice strategy builds on the existing USDA plan by addressing resilience in the context of climate change, improving access to USDA financial and technical assistance programs through the StrikeForce Initiative for Rural Growth and Opportunity, and other outreach to underserved communities," said USDA Deputy Undersecretary Arthur 'Butch' Blazer. "We encourage feedback on this USDA Environmental Justice Strategy and look forward to hearing from the people impacted by our policy decisions."

USDA works to meet the needs of historically underserved communities by reducing environmental burdens and increasing access to environmental benefits that help make all communities safe, vibrant, and healthy places to live and work. USDA is committed to achieving environmental justice throughout every community in America.

To meet its goals and deliver measurable results, USDA staff periodically update the strategic plan outlining key priorities and tactics to increase capacity building, public participation, and opportunities for minority, low-income, American Indian and Alaska Native Communities, and Tribal governments.

The draft USDA Environmental Justice Strategic Plan is available here: USDA Environmental Strategic Plan.

Comments on the Plan may be submitted via email to <u>EJStrategy@usda.gov</u> beginning January 15, 2016. **Comments are due by February 14, 2016**.

Blessings,

Mustafa Santiago Ali

Subject: National Youth Work Group on Climate Justice

Environmental Justice & Climate Justice Family,

I wanted to share the information below with you on the "National Climate Justice Youth Work Group" we are launching today. I know many of you have been huge supporters of youth and providing opportunities for them to be more engaged on a substantive level on environmental and social justice issues. This National Climate Justice Youth Work Group, is a "first of its kind" opportunity and will hopefully further highlight for many, the incredible innovation, energy and ingenuity that youth bring to the work of addressing climate change. I hope you will share this opportunity broadly with your networks and youth who may be interested:

EPA Seeking Young Adults to Serve on NEJAC Youth Work Group on Climate Justice

EPA is seeking young adults, ages 18 to 29, who are involved in climate change efforts and/or advocacy, to participate on this "first of its kind" youth-led advisory work group to assist the National Environmental Justice Council (NEJAC) in developing advice and recommendations to assist EPA in developing best practices to address climate change concerns. EPA recognizes the key role that youth play in bringing awareness to climate change and offering solutions to transform our societies toward a low-carbon and climate resilient future. It is essential that youth have a seat at the table and help inform the hard decisions that must be made that affect so many. Thus, the formation of the NEJAC Youth Perspectives on Climate Justice Work Group seeks to include young people in assisting EPA in addressing climate change concerns.

The work group will explore several issues, including:

- How can EPA effectively engage with youth on climate change and adaptation planning using new resources and tools designed to help communities become more resilient and better protect themselves from the impacts of climate change? What activities and mechanisms (e.g. policy, guidance, or protocol) should EPA consider to authentically engage and work collaboratively with youth, and other interested stakeholders, to identify and address climate change impacts on overburdened and vulnerable communities?
- What best practices, including efforts to address the compounding health vulnerabilities brought on by climate change, can be provided using youth driven projects from across the United States from which results-oriented recommendations can be drawn?

Applications are due November 30, 2015

The NEJAC Youth Perspectives on Climate Justice Work Group will be convened in January 2016. We anticipate that the work group will conduct its business primarily through bimonthly teleconference calls. This work group may meet face-to-face once annually. The average workload for the members is approximately 4 to 5 hours per month, which represents a rough estimate of the time members will spend in teleconference calls and reviewing relevant documents.

We are looking forward to working with a geographically diverse group of emerging thought leaders in the climate change space. **Check out the video here:** Your Voice Matters! Apply now for the new "Climate Justice Youth Work Group."

Subject: National Youth Work Group on Climate Justice

Environmental Justice & Climate Justice Family,

I wanted to share the information below with you on the "National Climate Justice Youth Work Group" we are launching today. I know many of you have been huge supporters of youth and providing opportunities for them to be more engaged on a substantive level on environmental and social justice issues. This National Climate Justice Youth Work Group, is a "first of its kind" opportunity and will hopefully further highlight for many, the incredible innovation, energy and ingenuity that youth bring to the work of addressing climate change. I hope you will share this opportunity broadly with your networks and youth who may be interested:

EPA Seeking Young Adults to Serve on NEJAC Youth Work Group on Climate Justice

EPA is seeking young adults, ages 18 to 29, who are involved in climate change efforts and/or advocacy, to participate on this "first of its kind" youth-led advisory work group to assist the National Environmental Justice Council (NEJAC) in developing advice and recommendations to assist EPA in developing best practices to address climate change concerns. EPA recognizes the key role that youth play in bringing awareness to climate change and offering solutions to transform our societies toward a low-carbon and climate resilient future. It is essential that youth have a seat at the table and help inform the hard decisions that must be made that affect so many. Thus, the formation of the NEJAC Youth Perspectives on Climate Justice Work Group seeks to include young people in assisting EPA in addressing climate change concerns.

The work group will explore several issues, including:

recommendations can be drawn?

and tools designed to help communities become more resilient and better protect themselves from the impacts of climate change? What activities and mechanisms (e.g. policy, guidance, or protocol) should EPA consider to authentically engage and work collaboratively with youth, and other interested stakeholders, to identify and address climate change impacts on overhundered and vulnerable communities?
climate change impacts on overburdened and vulnerable communities? •□□□ What best practices, including efforts to address the compounding health vulnerabilities brought on by climate

change, can be provided using youth driven projects from across the United States from which results-oriented

Applications are due November 30, 2015

The NEJAC Youth Perspectives on Climate Justice Work Group will be convened in January 2016. We anticipate that the work group will conduct its business primarily through bimonthly teleconference calls. This work group may meet face-to-face once annually. The average workload for the members is approximately 4 to 5 hours per month, which represents a rough estimate of the time members will spend in teleconference calls and reviewing relevant documents.

We are looking forward to working with a geographically diverse group of emerging thought leaders in the climate change space. **Check out the video here:** Your Voice Matters! Apply now for the new "Climate Justice Youth Work Group."

Check out today's EJ in Action Blog to read more about why your voice matters.

MEDIA ADVISORY

September 25th, 2015

Media Contact - Brian Willis, (202) 675-2386, brian.willis@sierraclub.org

MONDAY: Environmental, Public Health, and Civil Rights Advocates to Voice Strong Opposition to Weakest Protections Against Smog Pollution

The Sierra Club, EarthJustice, NRDC, Moms Clean Air Force, and NAACP to voice opposition to 70ppb Standard

WASHINGTON, D.C. - On Monday, September 28th, leaders from the Sierra Club, EarthJustice, NRDC, Moms Clean Air Force, and NAACP will hold a media teleconference to voice their strongest opposition to a 70 parts per billion (ppb) smog pollution standard and call on President Obama to follow the guidance of medical science, not the polluter lobby, in his Administration's decision to set a final standard next week.

A 70 ppb standard is the weakest possible standard based on the range proposed by the Environmental Protection Agency (EPA) last year and <u>ignores the half million comments</u> <u>submitted</u> to EPA supporting the the recommendations of numerous medical organizations. This teleconference comes as the Administration prepares to release a final standard by October 1.

WHAT: Leaders from Sierra Club, EarthJustice, NRDC, Moms Clean Air Force, and NAACP to hold a media teleconference voicing their strongest opposition to a 70 ppb smog pollution standard.

WHO: Speakers will include:

- Mary Anne Hitt Director of Sierra Club's Beyond Coal Campaign
- John Walke Director of the NRDC's Climate and Clean Air Program
- Jacqueline Patterson Director of the NAACP Environmental and Climate Justice Program
- Molly Rauch Public Health Policy Director for Moms Clean Air Force
- David Baron Managing Attorney for EarthJustice

WHEN: Monday, September 28th, 2015 at 2:30 PM EST

Where: Teleconference Line: TBA

###

About the Sierra Club

The Sierra Club is America's largest and most influential grassroots environmental organization, with more than 2.4 million members and supporters. In addition to helping people from all backgrounds explore nature and our outdoor heritage, the Sierra Club works to promote clean energy, safeguard the health of our communities, protect wildlife, and preserve our remaining wild places through grassroots activism, public education, lobbying, and legal action. For more information, visit www.sierraclub.org.

Hi Mustafa

Can there be an extension on the IWG comments? Working on the EJ2020 took a lot of time and now there are the EPA's Draft Strategic Plan on its Title VI "External Compliance" Program and IWG comments.

We really don't have the bandwidth, even for folks have paying jobs. This summer I have been swamped with:the Katrina X commercration, Clean Power Plan digestation and dissemination and now I was able to raise money but now have to put together our program on the Clean Power Plan for Sierra Club for our funder (not to mention smog/ozone rule). Many budgets, many calls, changing workplans etc. This is my top priority b/c i have hire (send anyone good people to our sierraclub.org/careers website for the EJ State Coordinator position) and get buyin for the rest of the organization on the EJ and labor implications of the CPP.

Besides one month is never enough time. We have to consult with folks and it takes a couple weeks just to set a conference call.

Your understanding is appreciated. thanks, Leslie

Lisa,

I hope all is going well on your end, it is crazy as usual over here with trying to get the Agency to do the right thing \sqcup .

Two quick items:

- 1) You asked me to let you know of talented folks who cross my path and a young lady by the name of "Marcia O. Wright" will be interviewing with Earth Justice this week. You may want to keep her on your radar.
- 2) I want to invite Administrator Jackson to an event in April and I lost her number when my phone got jacked up, do you have contact info for her?

Julia,

It was great to meet you as well and thank you for the very informative presentation. The next round of MVD projects will probably be dependent on whoever the new Administration might be, so we will have to wait and see. As an initial step and to help others learn about the current impacts and opportunities that exist - you could do a blog on the "EJinAction" blog which reaches a large audience. There is also a Regional IWG in place in Region 4 that Cynthia can share more info on that is doing some very innovative work with stakeholders.

Hey Cynthia, Pat, and Mustafa,

Thank you for inviting me to participate in Wednesday's EJ program at the BIG training institute. I left feeling energized and inspired by the opportunity to make a difference in the Everglades Agricultural Area communities.

Do you think there's a possibility that one of the Western Palm Beach County municipalities could become one of EPA's Making a Visible Difference Communities? Are there other ways we might partner to help break through on the environmental health and economic disparities?

Just FYI, I'm working with a number of organizations to support training and other opportunities in the Everglades Agricultural Area. I'm doing it to demonstrate authentic care for the communities who have so few options -- in a place where the biggest employer is making them sick! Hopefully over the longer term this same group pf people can help train residents to work in the more healthful, sustainable and enriching (\$ and socially) greenharvesting jobs. Please see the attached very very draft memo I just put together for our newly-formed working group.

Thanks again and best regards -- Julia

On Dec 9, 2014, at 8:13 AM, "Danielle Deane" < DDeane@rabengroup.com > wrote:

Green 2.0 Friends, good morning! As we have fun coming together, let's maximize the opportunity before us to build relationships with the media for our long term goals. Please read all the guidance below and attached.

As a reminder, we'll need all hands on deck to get likely over a 100 people (!) seated for an on-time start, especially as we need to accommodate the EPA Administrator. © Look out for TRG folks who will have easy but critical tasks for you. We'll be handing many of you clipboard with RSVPs to check folks off and then "runners" will get them to their seats and food. (If someone is not on the RSVP list, make sure to get a business card or have them write contact info on back of one of your RSVP sheets.)

Reminders from our comms teams:

- 1. You are more quotable with a handy statistic from study. Need a reminder? Attached is our handy fact sheet.
- 2. See the recap of talking points attached and reporter guidance re our diversity data pledge effort (and our Green 2.0 effort overall). A must read.
- 3. Social media kit attached (lots of sample tweets start this morning with the "preevent" ones!)

Some excerpts below, but again please read all the guidance below and attached.

See you all for the picture at 11:45 (get there at 11:30 if at all possible as we'll be unable to wait.) Thank you all for the awesome work!

In addition to speaking in your individual capacity on the working group, you will speak on behalf of Green 2.0.

- Beth Lynk from The Raben Group may send reporters your way as we get press calls.
- If you receive calls directly from the press, and we haven't given you a heads up they are calling, please contact Beth Lynk at blynk@rabengroup.com, Ex. 6 Personal Privacy or Estuardo Rodriguez at erodriguez@rabengroup.com

Press can sometimes try to play interviewers against each other. So it's critical for us to know who is talking to who and to direct reporters to the best working group member for the question, given our strategic communications goals. We can give you a heads up on themes, pitfalls etc.

- · Likely time windows for calls:
- o Post Media and Stakeholder Briefing 1:30 to 2:00 PM on Tuesday, December 9th

SPOKESPERSON TALKING POINT GUIDE

This memo is designed to help you navigate press interviews about Green 2.0, the Diversity Data Gathering partnership with GuideStar and Green 2.0, and Dorceta Taylor's report, "The State of Diversity in Environmental Organizations: Mainstream NGOs, Foundations & Government Agencies."

A few key media interview points to always remember:

- Reporters can only print what you say, not what you don't say. It might feel unnatural to not explain something exhaustively but the best responses are short and on message. When you're done answering, just stop.
- Being "on message" means repeating the same thing over and over, even if you feel repetitive, and even if you're sick of saying it. If you're doing it right, you'll feel both repetitive and 'sick of saying it,' always.
- Don't speak for anybody but yourself or on behalf of your institution. Reporters will frequently try to get you to speculate on the views of another group or entity. Just say "You'll have to ask them but I am happy to talk about...." then answer with your views.

- Always answer in the affirmative even if the question begs a "no, we're not." Everyone remembers "I am not a crook" and not fondly.
- Keep answers short and quotable. Reporters only have room for short sentence or two. A rambling, complicate response makes you a less valuable -- quotable -- source.

The guide below provides some examples of the above and is designed to help keep you on message.

Green 2.0 DC Media and Stakeholder Briefing Social Media Kit

Green 2.0 is excited to convene a media and stakeholder briefing on the steps mainstream environmental organizations can take to increase diversity at the highest levels on December 9 at the National Press Club. Speakers will discuss the challenges that make bridging the diversity gap more urgent than ever, and what some are doing to solve it.

Below you will find a series of tweets that we encourage you to tweet.

Subject: NEJAC

Stephanie,

I wanted to send a personal note to make sure you knew that we re-opened the nominations period for NEJAC. Please free to share with those you think may be interested.

Deadline for Submitting Nominations to the National Environmental Justice Advisory Council (NEJAC) re-opened <u>until March 6, 2015</u>

The U.S. Environmental Protection Agency (EPA) invites nominations from a diverse range of qualified candidates to be considered for appointment to its National Environmental Justice Advisory Council (NEJAC). The NEJAC was chartered to provide advice regarding broad, crosscutting issues related to environmental justice. This notice solicits nominations to fill approximately eight (8) vacancies for terms through September 2017.

To maintain the representation outlined by the charter, nominees will be selected to represent:

- academia
- · grassroots community-based organizations
- non-governmental environmental organizations
- local governments
- business and industry
- tribal government and indigenous organizations

Vacancies are anticipated to be filled by June 2015. Specific information about how to apply and the criteria for appointment can be found

at: https://www.federalregister.gov/articles/2014/11/05/2014-26328/national-environmental-justice-advisory-council.

How to apply:

- Submit nominations electronically with the subject line "NEJAC Membership 2015" tomuriel.jasmin@epa.gov andwhite.sherri@epa.gov.
- You also may submit nominations by mail to: Jasmin Muriel, NEJAC Project Manager,
 Office of Environmental Justice, U.S. Environmental Protection Agency, 1200
 Pennsylvania Avenue NW(MC 2201A), Washington, DC 20460. Non-electronic submissions must follow the same format and contain the same information as electronic submissions.

The Office of Environmental Justice will acknowledge receipt of all nominations. All

nominations must be postmarked no later than March 6, 2015.

For more information, contact:	Sherri P. White, Designated Federal Officer, 1	NEJAC, U.S. EPA;
telephone (202) 564-2462; fax:	(202) 564-1624

Lisa,
I hope all is going well on your end, it is crazy as usual over here with trying to get the Agency to do the right thing 
Two quick items:
1) You asked me to let you know of talented folks who cross my path and a young lady by the name of "Marcia O. Wright" will be interviewing with Earth Justice this week. You may want to keep her on your radar.
2) I want to invite Administrator Jackson to an event in April and I lost her number when my phone got jacked up, do you have contact info for her?
Blessings
Mustafa

Subject: Coming Soon - Draft Federal Interagency Working Group on Environmental Justice (EJ IWG)
FY 2016-2018 Action Agenda Framework for public comment.

Environmental and Climate Justice Family,

I wanted to give you a heads up that on next Tuesday (8-25-15) we will be sharing the **Draft** Federal Interagency Working Group on Environmental Justice (EJ IWG) FY 2016-2018 Action Agenda Framework for public comment. As I know all of you are aware, the issues in our communities requires a holistic strategy and having the 17 Agencies and White House offices identified in E.O 12898 engaged is one of the ways to make progress on the issues and opportunities that exist in communities with environmental justice concerns. There will be a couple of ways for folks to participate in the comment period. There will be a set of webinars and opportunities to email in comments. I hope you will see value in sharing your thoughts and ideas as we move forward together on the Draft Federal Interagency Working Group on Environmental Justice (EJ IWG) FY 2016-2018 Action Agenda Framework. Please be on the lookout next week for the announcement and how to get engage in the process.

If you have questions please contact Marsha Minter at: minter.marsha@epa.gov

Blessings,

Mustafa Santiago Ali

EJ Family	V
Lo i amin'	y,

I wanted to share some EJ information and a conference call on Ozone Standards that you may find of value. I have numbered each one, so that you can more easily locate the information that you find most useful:

- #1 CNN article on the National Ambient Air Quality Standards for ozone
- #2 Conference call today on the National Ambient Air Quality Standards for ozone
- #3 Press release on National Ambient Air Quality Standards for ozone
- #4 Environmental Justice Executive Order Press Release (Good info inside this one)

1) U.S. EPA: We need tougher ozone standards

By Gina McCarthy, U.S. EPA Administrator @CNNMoney November 26, 2014: 6:00 AM ET

http://money.cnn.com/2014/11/26/news/economy/epa-stronger-ozone-standard/

2)

Today, EPA is proposing revisions to the National Ambient Air Quality Standards for ozone, as required by the Clean Air Act, to improve public health and environmental protection.

We invite you to join today's stakeholder briefing where senior EPA officials will provide an overview on the proposed rule and answer questions regarding the proposal.

For the full news release: http://go.usa.gov/HnrP

To assist operators, please dial in 15 minutes prior to the start of the call. Details of the call can be found below:

Participant Dial-in Number: Ex. 6 - Personal Privacy

Ex. 6 - Personal Privacy

When: Wednesday, November 26, 2014

Time: 12:00 p.m. EST

We encourage your participation and additional information can be found on our website: www.epa.gov/ozone

3) News Releases from Headquarters

EPA Proposes Smog Standards to Safeguard Americans from Air Pollution

Release Date: 11/26/2014

Contact Information: Enesta Jones, Jones.enesta@epa.gov, 202-564-7873, 202-564-4355

WASHINGTON -- Based on extensive recent scientific evidence about the harmful effects of ground-level ozone, or smog, EPA is proposing to strengthen air quality standards to within a range of 65 to 70 parts per billion (ppb) to better protect Americans' health and the environment, while taking comment on a level as low as 60 ppb. The Clean Air Act requires EPA to review the standards every five years by following a set of open, transparent steps and considering the advice of a panel of independent experts. EPA last updated these standards in 2008, setting them at 75 ppb.

"Bringing ozone pollution standards in line with the latest science will clean up our air, improve access to crucial air quality information, and protect those most at-risk. It empowers the American people with updated air quality information to protect our loved ones - because whether we work or play outdoors - we deserve to know the air we breathe is safe," said EPA Administrator Gina McCarthy. "Fulfilling the promise of the Clean Air Act has always been EPA's responsibility. Our health protections have endured because they're engineered to evolve, so that's why we're using the latest science to update air quality standards - to fulfill the law's promise, and defend each and every person's right to clean air."

EPA scientists examined numerous scientific studies in its most recent review of the ozone standards, including more than 1,000 new studies published since the last update. Studies indicate that exposure to ozone at levels below 75 ppb -- the level of the current standard -- can pose serious threats to public health, harm the respiratory system, cause or aggravate asthma and other lung diseases, and is linked to premature death from respiratory and cardiovascular causes. Ground-level ozone forms in the atmosphere when emissions of nitrogen oxides and volatile organic compounds "cook" in the sun from sources like cars, trucks, buses, industries, power plants and certain fumes from fuels, solvents and paints. People most at risk from breathing air containing ozone include people with

asthma, children, older adults, and those who are active or work outside. Stronger ozone standards will also provide an added measure of protection for low income and minority families who are more likely to suffer from asthma or to live in communities that are overburdened by pollution. Nationally, 1 in 10 children has been diagnosed with asthma.

According to EPA's analysis, strengthening the standard to a range of 65 to 70 ppb will provide significantly better protection for children, preventing from 320,000 to 960,000 asthma attacks and from 330,000 to 1 million missed school days. Strengthening the standard to a range of 70 to 65 ppb would better protect both children and adults by preventing more than 750 to 4,300 premature deaths; 1,400 to 4,300 asthma-related emergency room visits; and 65,000 to 180,000 missed workdays.

EPA estimates that the benefits of meeting the proposed standards will significantly outweigh the costs. If the standards are finalized, every dollar we invest to meet them will return up to three dollars in health benefits. These large health benefits will be gained from avoiding asthma attacks, heart attacks, missed school days and premature deaths, among other health effects valued at \$6.4 to \$13 billion annually in 2025 for a standard of 70 ppb, and \$19 to \$38 billion annually in 2025 for a standard of 65 ppb. Annual costs are estimated at \$3.9 billion in 2025 for a standard of 70 ppb, and \$15 billion for a standard at 65 ppb.

A combination of recently finalized or proposed air pollution rules – including "Tier 3" clean vehicle and fuels standards – will significantly cut smog-forming emissions from industry and transportation, helping states meet the proposed standards. EPA's analysis of federal programs that reduce air pollution from fuels, vehicles and engines of all sizes, power plants and other industries shows that the vast majority of U.S. counties with monitors would meet the more protective standards by 2025 just with the rules and programs now in place or underway. Local communities, states, and the federal government have made substantial progress in reducing ground-level ozone. Nationally, from 1980 to 2013, average ozone levels have fallen 33 percent. EPA projects that this progress will continue.

The Clean Air Act provides states with time to meet the standards. Depending on the severity of their ozone problem, areas would have between 2020 and 2037 to meet the standards. To ensure that people are alerted when ozone reaches unhealthy levels, EPA is proposing to extend the ozone monitoring season for 33 states. This is particularly important for at-risk groups, including children and people with asthma because it will provide information so families can take steps to protect their health on smoggy days.

The agency is also proposing to strengthen the "secondary" ozone standard to a level within 65 to 70 ppb to protect plants, trees and ecosystems from damaging levels of ground-level ozone. New studies add to the evidence showing that repeated exposure to ozone stunts the growth of trees, damages plants, and reduces crop yield. The proposed level corresponds to levels of seasonal ozone exposure scientists have determined would be more protective.

EPA will seek public comment on the proposal for 90 days following publication in the Federal Register, and the agency plans to hold three public hearings. EPA will issue final ozone standards by October 1, 2015.

To view the proposal: http://www.epa.gov/glo/

Subject: Community Driven Revitalization in Spartanburg			

Environmental Justice, Equitable Development & Climate Justice Family,

I wanted to share the latest blog that is garnering a lot of attention around the country. This story focuses on the ReGenesis project in Spartanburg, SC and how they leveraged an Environmental Justice small grant of \$20,000 into over \$250,000,000 in community driven revitalizations. Please take a look, leave a comment and share with your networks.

Your comments help to reinforce that there is a need for more attention in our under resourced and overburdened communities.

Blog: A Dream Realized: Community Driven Revitalization in Spartanburg

Check out our latest blog post, <u>A Dream Realized: Community Driven Revitalization in Spartanburg</u>, by Timothy Fields Jr. In today's post, Tim tells the story of ReGenesis and how it brought people together to work collaboratively to envision and implement broad solutions towards creating visible change in their Spartanburg, SC community.

Also, check out our new Climate Justice in Action Series, which focuses on reframing the

conversation on climate change to include environmental justice issues. Read our kickoff post featuring a video from Administrator McCarthy, and contribute success stories from your local area on our interactive climate justice map. In the <u>most recent post</u> in the series, Hilton Kelley talks about the massive industrial pollution that plagues low-income and minority communities in Port Arthur, and discusses how climate change will only make conditions worse in this hurricane hotspot.

Be sure to <u>add your e-mail address</u> to the subscribe link on the upper-right side of the blog's home page to receive our future posts directly each week. Click the "Like" button to let your friends know about this great resource. Thank you for helping up spread the word!

Hi Mustafa,

Is there a good number to reach you? I know it's short notice, but we'll have a group of folks in from across the country next Tuesday the 7th for the SSM hearing and it would be great if we could snag a quick meeting with you in the afternoon. We should be wrapped up with testifying by 1pm.
Thanks very much,
Terry

Hi everyone.

I wanted to make sure that our own are uplifted during "Women's History Month" so please read our latest blog and leave a comment. Also please share widely - I want to share with the Agency and others how many incredible women are and have been apart of the Environmental Justice Movement.

I'm having a wall of sheros being developed for the OEJ website so hopefully I can get it through the bureaucracy in the next couple of days. It will house the names, faces and contributions of those who people identify in the blog and others that we know have done great things to move us toward environmental justice.

Blessings Mustafa

EJ in Action Blog: Celebrating Women Making a Visible Difference in Communities

Check out our latest blog post, Who's Your Environmental Justice Shero?, by Dr. Marva King of the EPA's Office of Environmental Justice. Following the anniversary of the Executive Order on Environmental Justice and in honor of Women's History Month, Dr. King reflects on some of the many women in the Environmental Justice movement that have made an impact on her life. Join us in celebrating by writing about your EJ Shero in the comments section.

Also, check out our 20th anniversary page and video series, which features federal and local government officials, non-profit leaders and students who have shared stories about their lessons learned over time working on environmental and climate justice.

Be sure to add your e-mail address to the subscribe link on the upper-right side of the blog's home page to receive our future posts directly each week. Click the "Like" button to let your friends know about this great resource. Thank you for helping up spread the word!

Sent: Thur 3/13/2014 3:04:48 PM **Subject:** Fw: Personnel Announcement

I know that most people have heard the news that Lisa Garcia is transitioning to a new position but just in case you have not - I wanted to share the announcement.

From: Message from the Administrator < Mass Mailer@epa.gov>

Sent: Thursday, March 13, 2014 10:16:00 AM

To: All EPA Employees

Subject: Personnel Announcement

Dear Colleagues,

It is with mixed feelings I announce that Lisa Garcia, my senior advisor on environmental justice, will be leaving the agency at the end of the month to become the Vice President for Litigation at EarthJustice. I and everyone at EPA will really miss her but we can all take pride in her success in finding such a great opportunity to expand her impact in communities. As you may know, Lisa was appointed in 2009 by Administrator Lisa Jackson to this newly created position to elevate environmental justice to the highest levels of the Agency. Lisa quickly seized the opportunity by developing Plan EJ 2014, EPA's roadmap to integrating and strengthening EJ throughout its programs, activities, and decisions. The success of Plan EJ 2014 has served as a model of how to work across programs and regions to facilitate the implementation of a top priority which cuts across the entire Agency.

Lisa also worked with all of our regions and programs to promote meaningful, working relationships with overburdened, low income, minority and tribal communities, as well as to build strong partnerships, as lead for the EJ Interagency Working Group, with other Federal agencies to address some of the country's most persistent environmental challenges. Under Lisa's leadership, this Agency has improved our environmental justice work and delivered tools – such as EJ Legal Tools, EJ Screen, Technical Guidance for EJ in Rulemaking and Enhanced Public Outreach in Permitting – that will have immeasurably furthered EPA's pursuit of the mandate of the EJ Executive Order. This work will serve this Agency and our nation's environmental justice work for years to come. Please join me in thanking Lisa for her dedication and commitment to promoting our EJ priority.

In large part because of the vision Lisa brought to this demanding job, along with the commitment of our RAs, AAs and many others across the agency, leadership for advancing environmental justice is now shared across all our programs and regions. So even though Lisa is moving on, the work she started will

be vigorously advanced by the entire agency leadership as well as staff in every office. That's the commitment and promise of Plan EJ 2014, and one that I will be holding our leadership to. While we search for our new Senior Advisor, the Agency will continue to depend on the EJ advocacy of the Office of Enforcement and Compliance Assurance, the policy direction from Director Matthew Tejada and the superb staff of the Office of Environmental Justice, with Charles Lee's guiding hand for Plan EJ 2014.

Subject: Re: Howard Student EJ - Brunch

Are any of you available on March 29 – that is the last Saturday in March. [tr. 6 - Personal Privacy] and his guest (another outstanding environmental law student – [Ex. 6 - Personal Privacy] are available that day. I was thinking that we could meet sometime between 10 and 1pm at Open City coffee house (2331 Calvert St. NW, http://www.opencitydc.com) - this location has the benefit of being right on the Red Line, and quite convenient for our guest of honor. My plan is to treat [Ex. 6 - Personal Privacy] and I will get there early to get us a table. I do need an accurate count beforehand however, so please let me know if you will be able to come AND if there is a particular time that is better for you. I will work with [tr. 1 Personal Privacy] to set a time that accommodates the most people.

Thanks!! And I look forward to seeing you.

http://www.nma.org/index.php/speeches-op-eds-and-letters-to-the-editor/2067-guest-op-ed-charles-steele-jr-let-s-tell-the-epa-first-do-no-harm

Guest Op-ed: Charles Steele Jr.: Let's tell the EPA: First, do no harm

Date: Monday, 16 March 2015 13:54

Last Updated on Wednesday, 25 March 2015 18:07

Guest op-ed in the Tuscaloosa News by Dr. Charles Steele Jr., president and CEO of the Southern Christian Leadership Conference, a civil rights organization.

Read the op-ed on the Tuscaloosa News web site here.

You've probably heard the familiar oath: "First, do no harm." It's the pledge doctors are obliged to follow when treating an illness or injury.

Our government in Washington should heed the same advice: Don't treat one problem by creating another, more serious one.

That caution comes to mind as I've considered new regulations on power plants that the U.S. Environmental Protection Agency (EPA) will propose this summer. As a step toward addressing climate change, the EPA wants to curb carbon emissions from coal-burning power plants and wants governors across the country to shut down coal-fired plants in their states.

The problem is these are the same plants that provide the biggest portion of our electricity, and usually at the most affordable rates. Climate change may well be a serious issue, and one that deserves an informed response from our government. But the EPA's plan isn't the right one. According to a growing number of experts who are responsible for overseeing our nation's electricity supply, the EPA's plan will do next to nothing for global warming but will raise the cost of electricity for both homes and businesses. It could even make the supply of electricity for all of us less reliable.

As a person who has spent a lifetime fighting on behalf of poor people, this concerns me greatly, and it troubles the Southern Christian Leadership Conference that I represent.

The reason is simple: Higher electricity bills hurt poor and low-income families the most. These communities, frequently consisting of disadvantaged minorities, already spend a larger share of their limited income on monthly utility bills — far more than affluent communities spend as a share of their income. In fact, a Stanford University study suggests the new regulations would mean households in the lowest income group shouldering increased energy costs at more than twice the rate of households in the highest 10 percent of income.

Paying for electricity is not a discretionary expense. The poor and the elderly on fixed incomes need heat in the winter and air conditioning in the summer as much as higher-income households, only they have fewer dollars to pay for these necessities.

Rising utility bills can often result in painful sacrifices — a poorer diet, poorer health, fewer of life's little pleasures and certainly none of the costlier ones. And utility bills are bound to climb as the most affordable electricity is eliminated, forcing us to rely on costlier sources. People's health conditions are impacted if they are forced to live without air conditioning or heat, or if meals are skipped just to foot higher utility bills.

This is a case of government trying to make things better while creating spin-off problems. Surprisingly, even the environmental benefit will be negligible. That's because American power plants are now far cleaner, and are no longer the largest source of carbon emissions. Instead, power plants and factories in Asia produce far greater carbon output.

Overall, the EPA is asking us to pay the price for a problem we can't fix, and it expects low-income households to pay the largest share.

Before the EPA adopts these measures, it should think twice about pursuing extreme rules that will have a negligible environmental impact, but could bring great pain to hard-working everyday Americans.

Dear Administrator McCarthy,

Please accept the attached letter, respectfully requesting that EPA publicly release EJSCREEN as soon as possible this year.

Earthjustice's President Trip Van Noppen and leaders from 45 other national and local organizations have signed this letter.

We appreciate your leadership on this important issue.

Very best regards,
Emma Cheuse and Stephanie Maddin

Subject: EJ 2020 Action Agenda - EPA's Draft Environmental Justice Strategy

EPA EJ 2020 Draft Framework April 2015.pdf

Dear Leslie Fields,

I am pleased to share with you a copy of the draft EJ 2020 Action Agenda (EJ 2020) Framework. EJ 2020 will be EPA's next overarching strategic plan for environmental justice. This Strategy builds on the foundation established by EPA's Plan EJ 2014, and expands that work through commitments that will continue over the next five years. EPA is seeking input on the draft EJ 2020 Action Agenda (EJ 2020) framework, which outlines our thinking about current efforts that require continued and focused attention and what additional challenges we should undertake.

EPA has made significant progress on advancing environmental justice, but there is much more to do. Building on the foundational work committed to in Plan EJ 2014, we need to define a new set of ambitious environmental justice goals for the coming years. Over the next five years, we will emphasize making a visible difference in overburdened communities. Our goals are to:

• LULULU Deepen environmental justice practice within EPA programs to improve the health
and environment of overburdened communities;
• □ □ □ □ □ □ Collaborate with partners to expand our impact within communities; and

• • • • • Demonstrate progress on outcomes that matter to communities.

Strengthening our collaboration with communities, partners and stakeholders is critical to EJ 2020's success.

EPA is conducting community and stakeholder engagement on the draft EJ 2020 framework. We hope to have robust dialogue with the communities we serve, governmental partners and all other interested stakeholders. From **April 15 to June 15, 2015**, we will conduct informational and dialogue sessions. We encourage you to participate in these sessions and request additional sessions, if needed. We also encourage you to submit comments on the EJ 2020 framework.

questions to Charles Lee at lee.charles@epa.gov or 202-564-2597.			
Have a blessed day,			
Mustafa Santiago Ali			

We intend to share the draft framework and additional information on EPA's Environmental Justice website next week, and there will be a notice on the EJ Listserv at that time. Please direct

Subject: RE: good to see you today; is there a list of state OEJ offices?

Leslie.

I'm just getting back in town I have been in Louisiana since last week. Here is a list of folks who participate on a EJ States call with reps east of the Mississippi. I'm trying to get a list for the west of the Mississippi. Please notice that this list also has EPA folks on it. I don't know of any other lists that exist but since you have brought this need to my attention, I'm going to have our summer intern work on creating a database to address this gap. I hope this info helps and I apologize for just getting it to you.

Court Upholds Air Safeguard that would Prevent Thousands of Deaths

NAACP joined other clean air advocates in defense of this important protection

Washington, D.C. — Today the U.S. Court of Appeals for the D.C. Circuit <u>upheld</u> the U.S. Environmental Protection Agency's 2012 Mercury and Air Toxics Rule (MATS). Earthjustice represented the NAACP, the Sierra Club, Clean Air Council, and the Chesapeake Bay Foundation in the case.

MATS will annually prevent up to 11,000 premature deaths, nearly 5,000 heart attacks and 130,000 asthma attacks, and more than 540,000 missed days of work days. It will also protect babies and children from exposures to mercury than can damage their ability to develop and learn. The EPA has estimated that every year, more than 300,000 newborns face elevated risk of learning disabilities due to exposure to mercury in the womb.

Coal-fired power plants are the largest source of toxic air pollutants, and account for almost half of the nation's mercury emissions. The Clean Air Act directed the EPA to set limits requiring the maximum achievable reductions in mercury, arsenic, lead, and the many other hazardous air pollutants that power plants emit no later than 2002. In 2012 after a decade of delay, the agency finalized the Mercury and Air Toxics rule. A group of industry and corporate polluters immediately filed a lawsuit challenging this rule.

The following are statements from groups who defended the Mercury and Air Toxics Rule:

Said Jacqueline Patterson, Director, Environmental and Climate Justice Program for NAACP:

"The NAACP applauds the D.C. Circuit Court for this important and historic decision. Civil rights are about equal access to protections afforded by law. Given the disproportionate impact of coal combustion pollution which negatively affects the health and educational outcomes as well as the economic wellbeing of communities of color, the Mercury and Air Toxics Rule is a critical tool for exacting justice. These standards provide essential safeguards for communities who have suffered from decades of toxic exposure."

Said Chesapeake Bay Foundation Vice President for Litigation Jon Mueller:

"Mercury from power plants is a leading source of the pollution that has led to fish consumption advisories in rivers and streams around the country as well as here in the Chesapeake Bay region. Those contaminated fish put the health of many, including those who fish to feed their families, at risk," said Jon Mueller, Chesapeake Bay Foundation Vice President for Litigation. "These new limits will reduce pollution and the associated human health risks, and is a legacy that we should leave to our children and future generations."

Said Joseph Otis Minott, Executive Director, Clean Air Council:

"The court's decision to affirm these long, overdue standards clearly demonstrates the importance of controlling toxic emissions while also rejecting the complaints of inconvenience raised by industry and corporate polluters. We applied the court's judgment and look forward to ensuring this critical rule is properly implemented."

Said Mary Anne Hitt, Campaign Director for Sierra Club's Beyond Coal campaign:

"Coal- and oil-fired power plants are the largest source of mercury pollution that poisons our lakes and streams, as well as arsenic and other toxic metals and gases. By upholding the rule, the court has helped our country take a great step forward toward protecting our children from these dangerous pollutants."

Said Earthjustice attorney Jim Pew:

"The emission limits upheld in court today have already won broad public support, and for good reason. Power plants' toxic pollution takes a horrible toll on peoples' lives and health, especially in low income communities and communities of color. By allowing this rule to take effect, today's decision will help reduce that toll."

Dear Friends

I hope you're enjoying our Spring! The Goldman Prize Foundation informed me that this year's winner for Africa would like to meet local EJ folks while he is in town for the ceremony. So I'm putting together a meeting for him (all the winners' names are embargoed until late April). So you are cordially invited to meet this outstanding activist from the Continent, to share fellowship and strategies, here at the Sierra Club (address below) from 2-4pm on May 2.

Please rsvp and feel free to invite others, especially interns and students but please send me the names. Thanks, Leslie

FOR IMMEDIATE RELEASE 12/10/2014

WASHINGTON- The U.S. Environmental Protection Agency (EPA) today finalized new safeguards that promote responsible recycling of hazardous secondary materials and demonstrate a significant step forward in promoting recycling innovation, resulting in both resource conservation and economic benefits, while strengthening protections for environmental justice communities.

"Americans do not have to choose between a clean environment and economic prosperity," said Mathy Stanislaus, assistant administrator for EPA's Office of Solid Waste and Emergency Response. "This important rule gives communities a voice in the decisions that impact them, promotes safe and responsible recycling of hazardous secondary materials and conserves vital resources, while protecting those most at risk from the dangers of hazardous secondary materials mismanagement. This innovative rule demonstrates that protecting communities and leveraging economic advantages for sustainable recycling and materials manufacturing can go hand-in-hand."

The Definition of Solid Waste (DSW) final rule modifies the EPA's 2008 DSW rule to protect human health and the environment from the mismanagement of hazardous secondary material, while promoting sustainability through the encouragement of safe and environmentally responsible recycling of such materials.

EPA conducted a rigorous environmental justice analysis of the DSW rule that examined the location of recycling facilities and their proximity and potential impact to adjacent residents. The methodology and scope was developed through a broad public engagement and expert peer review process. The analysis identified significant regulatory gaps in the 2008 rule, which could negatively impact communities adjacent to third party recyclers, including disproportionately impacting minority and low-income populations.

It includes several provisions that result in both resource conservation and economic benefits by encouraging certain types of in-process recycling and remanufacturing:

- The rule addresses significant regulatory gaps in the 2008 rule by requiring off-site recycling at a facility with a RCRA permit or verified recycler variance, which will allow EPA and the states to verify that a facility has the equipment and trained personnel to safely manage the material, adequate financial assurance, is prepared to respond in case of an emergency, and can demonstrate that the recycling is not disposal in the guise of recycling. The new verified recycler exclusion also includes a public participation requirement for recyclers seeking variances, so that communities are notified prior to the start of recycling operations.
- The rule affirms the legitimacy of the pre-2008 DSW exclusions, such as the scrap metal exclusion, and does not change the regulatory status of material legitimately recycled under these long-standing exclusions.
- The final rule includes a revised definition of legitimate recycling that reaffirms the legitimacy of in-process recycling and of commodity-grade recycled products, such as metal commodities. The rule retains the exclusion for recycling under the control of the generator, including recycling onsite, within the same company and through certain types of toll manufacturing agreements, which recognizes those generators who follow good business practices by taking responsibility for their recycling and maintaining control of their hazardous secondary materials.
- Finally, the final rule includes a targeted remanufacturing exclusion for certain higher-value hazardous spent solvents, which are being remanufactured into commercial-grade products. This allows manufacturers to reduce the use of virgin solvents, resulting in both economic and environmental benefits, including energy conservation and reduced greenhouse gas emissions.

More information about this rulemaking can be found on EPA's website at: http://www.epa.gov/waste/hazard/dsw/rulemaking.htm.

The docket for this rulemaking is EPA-HQ-RCRA-2010-0742 and contains the supporting documents for the final rule, including the final DSW environmental justice analysis. The docket can be accessed at http://www.regulations.gov once the final rule is published.

Subject: Farm to Fuel discussion, October 10 - 11am EST

Good afternoon,

I hope this find you all doing well. During the Brownfields to Healthfields session at the Central Appalachia Conference some of you expressed interest in Farm to Fuel initiatives (growing crops to support renewable fuel production, including possibilities for renewable fuel generation on abandoned mined land). To follow up on this possibility, there will be a conference call with representatives from the Appalachia Regional Commission, Commercial Aviation Alternative Fuels Initiative, and USDA-Rural Development on **October 6th from 10 am -11 am EST**. If you have the time and interest, please let us know so we can share your information with the conference call organizers.

Looking forward to hearing from you and best wishes,

Alyssa

Dear community partners,

It was great to meet you all at the Central Appalachian Brownfields Conference! Your participation helped provided an invaluable perspective on current community conditions and opportunities. It would be great to get your overall thoughts on the conference, particularly what did you think was the most valuable part of attending and were there any partners you identified that you'll be following up with to support your efforts? I hope to hear from you soon and thanks again.

Best wishes,

Alyssa

Subject: B2H Plus in Central Appalachia: Collaborative Community Convening

Bill-

Just checking in to see if you are able to give a crisp overview (3-4 minutes) during the Community Convening on Sept 7 @ 6-7:45. Please let us know ASAP so we can finalize the agenda.

Thanks again:

The draft final agenda is:

B2H Plus in Central Appalachia: Collaborative Community Convening

September 7, 2016 @ 6:00-7:45

Agenda (draft 12)

Transforming remediated brownfields into healthy end uses is a fresh and inventive economic development strategy that serves lower-income families living in environmentally overburdened neighborhoods across the country. Known as Brownfields to Healthfields (b2H), this community driven approach leverages federal and state resources to establish health care clinics, local healthy food hubs, renewable energy projects, and parks and trails, among other end uses of brownfields redevelopment. OEJ is convening community leaders, academic institutions, brownfields consultants, private sector developers, and government partners to explore opportunities for collaboration that promote community health, economic and environmental vitality. Join us for this lively event to launch new collaborations across Central Appalachia.

Thanks again: The draft final agenda is: **B2H Plus in Central Appalachia: Collaborative Community Convening** September 7, 2016 @ 6:00-7:45 Agenda (draft 12)

Transforming remediated brownfields into healthy end uses is a fresh and inventive economic development strategy that serves lower-income families living in environmentally overburdened neighborhoods across the country. Known as Brownfields to Healthfields (b2H), this community driven approach leverages federal and state resources to establish health care clinics, local healthy food hubs, renewable energy projects, and parks and trails, among other end uses of brownfields redevelopment. OEJ is convening community

leaders, academic institutions, brownfields consultants, private sector developers, and government partners to explore opportunities for collaboration that promote community health, economic and environmental vitality. Join us for this lively event to launch new collaborations across Central Appalachia.

Subject: Central Appalachia Brownfields Conference planning

Dear community partners,

EPA's Office of Environmental Justice is excited to join you at the Central Appalachia Brownfields Conference! To make the most of the opportunity and connect your projects to potential assistance, we encourage bringing organizational information and factsheets for distribution. Perhaps consider developing a briefing sheet on your local brownfield priorities, see below my signature for suggestions.

We would like to draw your attention to two conference events. On September 7th, 6pm – 7:45pm we'll be holding a Community Convening with federal, academic, technical, and community partners to assess collaborative projects. Please let us know if you can join us. The following day, EPA's Suzi Ruhl will facilitate a Brownfields to Healthfields session, September 8th, 3-4:30pm. The full conference agenda is posted online at http://wvbrownfields.org/2016agenda/.

Also we are interested in meeting individually with you to discuss your ongoing projects and needs for support. Feel free to email me if you are available to meet during any of the following times:

September 7th

●□□□□□□ Morning networking break, 10am to 10:30am
•□□□□□□□ Afternoon networking break, 2:30pm − 3pm
September 8th
•□□□□□□□ Coffee before opening, 8am − 8:30am
●□□□□□□□ Networking break, 10am to 10:30am
Best wishes and hope to hear from you soon,
Alyssa

Bring a briefing sheet on your local brownfield priorities

Website: https://www.epa.gov/environmentaljustice

Tel: 202-564-0473

"Take the time to create a briefing sheet which fits on one sheet of paper (front and back is ok . .) describing your community, explaining your brownfield priorities and opportunities, and conveying what you need to move forward on those projects. The briefing sheet can describe the sites, their planned or potential reuses, their status, the level of stakeholder support for redevelopment, or other important information. Include graphics of envisioned reuses if available, and make sure to include your contact info. Print a bunch of these briefing sheets and be ready to spread them far and wide to developers, financers, public and non-profit officials, and other potential supporters at the conference."

Subject: Thank You re B2H at CARBS

Thank you so very much for all of your significant contributions during the Central Appalachian Region Brownfields Summit. The feedback I am receiving is that our collective efforts were spectacular, informative, and energizing. Due to your efforts, there is heightened awareness and

enthusiasm for advancing individual and community health, economic vitality, and environmental protection through brownfields redevelopment.

We appreciate you and the time you dedicated to the vital goal of promoting healthy, sustainable, resilient and equitable communities.

And, we look forward to working with you as we continue this mission!

Good morning Suzi and Alyssa,

Following up on your request for EDA participation at the upcoming brownfields conference, please be advised that EDA's West Virginia Economic Development Representative, Tracey Rowan, will provide staffing for the event. I have copied her supervisor, Area Director, Marguerite McGinley.

This week we have Tracey present in our regional office working on FY 2016 award processing priorities. In the coming weeks, she will have certain obligations to fulfill as the field coordinator in support of the the WV Economic Recovery and will also be reporting to the Joint Field Office in Charleston on this work. Nevertheless, Tracey is confident that she will be available for the conference in September.

Many thanks for including EDA in this outreach effort,

Dave,

As we discussed, there are several opportunities for EDA to play a role in the upcoming Central Appalachia Brownfields Conference. Attached are the iterative agendas for two key events organized by OEJ. We welcome EDA participation in both events. For example, EDA can serve as an expert lead for the working tables for both the convening and b2H session. We can discuss other opportunities as well.

Let me know next steps!

Thanks again!

Subject: RE: EDA regional economic development in Appalachia region

Hi David,

Thank you again for this morning's call. The Central Appalachia Brownfields Conference will take place September 7th – 8th in Charleston, West Virginia. Additional details can be found online at http://wvbrownfields.org/2016-conference/. Suzi will be following up with targeted information regarding Economic Resiliency sessions and other efforts that may be of interest for sharing with EDA's regional leads. We recently heard that ARC may be working with EDA to secure scholarships for community representatives to attend the conference? Might you be able to connect us to an EDA point of contact for additional information?

Related to our support in the Appalachia region, attached is a list of projects / needs that was developed in collaboration with our community-based partners. We continue to develop the list and work with our various partners to actualize and support these projects.

For our work in Alabama and California, I've looked at the information online for EDA's regional leads and want to confirm they are:

Alabama

Subject: EDA regional economic development in Appalachia region

Good afternoon Mr. Ives,

I attended the Urban Waters session you presented at and am very interested in learning further about EDA's regional economic development efforts. We, in EPA's Office of Environmental Justice, are working with a number of community-based organizations across the Appalachia Region, some of whom are looking to revitalize local economies around abandoned mined land. Might you have time for a brief phone conversation next week to exchange ideas and assess where our efforts might align? Feel free to let us know a range of days and times that work best with your schedule. Thanks in advance and we hope to hear from you soon.

Kind regards,

Alyssa

EPA's Office of Environmental Justice Collaborative Community Convening Roundtable

Instructions for Roundtable Exercise: The audience is divided into six groups and will address three topics. The topics are: Challenges in Overburdened and Underserved Communities; Opportunities for Brownfields Redevelopment, and Unique Partnerships for Successful Collaborations. At each table, there will be a Community Voice, Facilitator, Subject Matter Expert, and Government Representative. The group will spend 15 minutes discussing the topics and prompt questions. At the end of the 15 minutes, the Subject Matter Expert and Government Representative will rotate while the others stay at the table. A reporter will record promising practices and lessons learned and present top 1-2 observations during the Gathering to Launch Report Out.

Table 1 Topic: Challenges in Overburdened and Underserved Communities

Prompt questions:

- What problems of the community may be associated with brownfields?
- How do these problems relate to environment, health, and economic vitality?

Table 2 Topic: Opportunities from Brownfields Redevelopment **Prompt Questions:** What opportunities are provided through brownfields redevelopment? How do these opportunities relate to environment, health, and economic vitality? Table 3 Topic: Unique Partnerships for Successful Collaborations **Prompt Questions:** What types of stakeholders -- traditional and non-traditional -- are needed for success? How can we ensure that overburdened/underserved populations are included in decision-making and receive benefits? Central Appalachia Regional Brownfield Summit EPA's Office of Environmental Justice's Brownfields to Healthfields Group Exercise

Table:

Instructions for Group Exercise: The audience is divided into three groups based on interest-Health, Renewables, and Recreation/Healthy Foods. The audience will sit at their interest table(s) for the entire session. The Group Exercise will begin with each participant introducing themselves and their affiliation. Next, the subject matter expert(s) will provide opening remarks about the topic, including a summary of a success model and promising practices. Then, the facilitator will lead the group in discussing the questions. A reporter will record remarks and present top 1-2 observations during the Promising Practices Report Out.

Topic: Path

Prompt questions:

What are the community problems to be addressed?

What are potential solutions to the problem provided through brownfields redevelopment?

What results are expected?

What evidence is available to support these responses?

Topic: Place

Prompt Questions:

- Where is the potential brownfields project located?
- Is it one property or an area?
- What is the context:
 - o conditions of the property
 - o exposure routes to humans from the property
- What evidence is available to support these responses?

Topic: People

Prompt Questions:

- Who will benefit from the proposed project?
- How will local populations be impacted- positively and negatively?
- Who is engaged with the project?
- Who else needs to be involved in the project?
- What evidence is available to support these responses?

Revitalizing Central Appalachia through Brownfields to Healthfields 2016 Central Appalachian Regional Brownfields Summit September 8, 2016 @ 3:00-4:30

Transforming remediated brownfields into healthy end uses is a fresh and inventive economic development strategy that serves lower-income families living in environmentally overburdened neighborhoods across the country. Known as Brownfields to Healthfields (b2H), this community driven approach leverages federal and state resources to establish health care clinics, local healthy food hubs, renewable energy projects, and parks and trails, among other end uses of brownfields redevelopment. This session will provide information on brownfields redevelopment related to health, renewable energy, and recreation/healthy foods. It will also engage community leaders, academic institutions, brownfields consultants, private sector developers, and government partners in exploring opportunities for collaboration that promote community health, economic and environmental vitality. Join us for this lively session to launch new collaborations across Central Appalachia.

AGENDA

WELCOME, PURPOSE AND OVERVIEW (3:00 PM)

• Suzi Ruhl, U.S. EPA, Office of Environmental Justice; Rural Committee of the Federal Interagency Working Group on Environmental Justice

COMMUNITY INSPIRATION: Success Stories in Progress (3:10 PM)

- Emily Partin, South Cumberland Learning and Development Center, Grundy County, TN
- Matt Hepler, Southern Appalachian Mountain Stewards

RESOURCE INFORMATION: (3:30 PM)

- Dr. Burton Webb, President, University of Pikeville (UPike)
- Julie Lawhorn, Appalachian Regional Commission (ARC)
- Phil McMullan, Appalachian Management Systems (AMS), LLP

PARTNER IMPLEMENTATION: SMALL GROUP EXERCISE (3:50 PM)

 Suzi Ruhl, OEJ, US EPA; Rural Committee of the Federal Interagency Working Group on Environmental Justice

Table Topics and Leads

Health: Dr. Andrew R. Buzzelli, Founding Dean, UPike KY College of Optometry; Miles Ballogg, ATSDR BROWN/Cardno, Emily Partin, South Cumberland Learning and Development Center

Renewable Energy: Rich Altman, Volpe Center Commercial Alternative Aviation Fuel Initiative; Tony Logan, USDA-RD, Ohio Director; Julie Lawhorn, ARC

Recreation/Healthy Foods/Healthfields: Phil McMullan (AMS); Ty Houk, Greenway South Carolina; Matt Hepler, Southern Appalachian Mountain Stewards

Promising Practices Report Out

WRAP UP AND NEXT STEPS (4:20 PM)

Ann Carroll, U.S. EPA, Office of Brownfields and Land Revitalization

MENTAL POPULATION OF THE POPUL

US EPA Office of Environmental Justice (OEJ) b2H Plus in Central Appalachia: Collaborative Community Convening September 7, 2016 @ 6:00-7:45

Hi everyone,
Here is a bit more information on the panel Suzi referenced, and as she mentioned Adam Wells is one of the featured presenters:
Title: Revitalizing Central Appalachia through Brownfields to Healthfields
Overview: Identifying brownfields and transforming remediated brownfields and vacant properties into healthy end uses that contribute to creating healthier communities is a fresh and inventive economic development strategy that serves low-income, minority and tribal families living in environmentally overburdened neighborhoods throughout Central Appalachia. Brownfields to healthfields is successful approach that strengthens community health, equity, sustainability and resiliency for overburdened and underserved populations by increasing access to health care and settings that allow healthier choices for recreation and healthy foods, education and jobs. Learn how this progressive, evidence-based program can advance your community revitalization efforts.

Good morning everyone,

Another opportunity that may be of interest is the Central Appalachia Brownfields Conference, September 7-8, Charleston, West Virginia (see http://wvbrownfields.org/2016conference/). There are a number of sessions at the conference of relevance to connecting resources to potential projects. The following sessions might be of particular interest:

?□□□□□□□ EPA Grant Writing
?□□□□□□□ Empowering Small Communities - Strategies that Work: Success Stories from Appalachia
?□□□□□□□ Deal Structuring and Project Financing
?□□□□□□□ Pick Me!: Attracting Developers
?□□□□□□□ Show Me the Money! Part 1 - Government
?□□□□□□□ Show Me the Money! Part 2 – Philanthropic
?□□□□□□□ Show Me the Money! Part 3 - Private Developers
I've attached the full draft agenda for additional information. Please let us know if you plan on attending so that we can assess how best to connect you all to resources while there.
Kind regards,
Alyssa

Webinar: Leveraging Resources for Brownfields Revitalization, July 26

Full details at https://clu-in.org/training/webinar/BFLeveraging1/

This is the first in U.S. EPA Office of Brownfields and Land Revitalization's (OBLR) webinar series exploring what communities need to know to leverage resources to meet their brownfields revitalization challenges. This webinar will discuss available tools and focus on Dubuque, Iowa's, efforts to leverage its own resources to attract other federal, state, public and private sources of funding and technical assistance. July 26 from 1-2:30 p.m. EST.

Bill-

Just checking in to see if you are able to give a crisp overview (3-4 minutes) during the Community Convening on Sept 7 @ 6-7:45. Please let us know ASAP so we can finalize the agenda.

The draft final agenda is:
B2H Plus in Central Appalachia: Collaborative Community Convening

September 7, 2016 @ 6:00-7:45

Agenda (draft 12)

Transforming remediated brownfields into healthy end uses is a fresh and inventive economic development strategy that serves lower-income families living in environmentally overburdened neighborhoods across the country. Known as Brownfields to Healthfields (b2H), this community driven approach leverages federal and state resources to establish health care clinics, local healthy food hubs, renewable energy projects, and parks and trails, among other end uses of brownfields redevelopment. OEJ is convening community leaders, academic institutions, brownfields consultants, private sector developers, and government partners to explore opportunities for collaboration that promote community health, economic and environmental vitality. Join us for this lively event to launch new collaborations across Central Appalachia.

I. Welcome & Purpose (6:00 PM) 5 minutes

Thanks again:

- Suzi Ruhl, US Environmental Protection Agency Office of Environmental Justice and Federal Interagency Working Group on Environmental Justice Rural Committee
- Herb Pettijean, Kentucky Brownfields Coordinator

II. Introductions (6:05 PM) 15 minutes

Patrick Kirby, Northern West Virginia Brownfields Assistance Center

Participants will introduce themselves by name, organization and location

III. Spotlight on Impacted and Underserved Communities (6:20) 10 minutes total

- Adam Wells, Appalachian Voices
- Bill Price, Sierra Club (invited)

IV. Lead by Success (6:30) 15 minutes total

- Academic:
- o Burton Webb, PhD, President, University of Pikeville (UPike)
- Private Sector:
- o Miles Ballogg, Cardno/ATSDR BROWN
- Public Private Partnership:
- o /Rich Altman, DOT-Volpe CAAFI

V. Roundtables (6: 45) (45 minutes)

- Three topics addressed at five breakout tables:
- o Challenges in Your Community- Environmental, Economic, Health
- o Opportunities to Address Challenges Through a b2H Lens
- o Unique Partnering Opportunities
- Table Leads: Community, Subject Matter Experts, Facilitator (see attached chart)
- Time Allotment: 15 minutes for each topic then table leads will switch tables

VI. Gathering to Launch (7:30) 10 minutes

Elizabeth Limbrick, New Jersey Institute of Technology

- Report Out from Tables
- Identification of Next Steps

VII. Closing/Adjourn (7:40) 5 minutes

• Patrick.Kirby, Northern WVa Brownfields Assistance Center

Hi all:

This is a big email with lots of addressees so bear with me! The goal here is to set up a conference call between EPA Office of Environmental Justice representatives and the Alliance for Appalachia's Economic Transition Team and others who joined us in DC. Most importantly, we would like the opportunity to flesh out the rest of the agenda items that did not get addressed at the in-person meeting due to time constraints. See those topics below: Is there anything to add from either end?

- Project ideas from TN
- **Brownfield Funding Opportunities**
 - Is it possible to get funding for project scoping? Technical Assistance opportunities for coal communities with very limited capacity (often the communities most in need)
- What items should we include in our shovel ready project toolkit?
- EJ 2020
 - What are EPA's ideas around this plan? How wi
- Updates on NEJAC nominations
- *Addition: EPA EJ's response to what we presented in DC

If you're interested in being part of this conversation, please fill out the <u>Doodle poll here</u> by this Friday afternoon. I'll send the most popular date/time out Monday.

Depending on the responses, we'll decide whether it makes more sense to have a voice call or video hangout-- might be nice to see each other's faces!

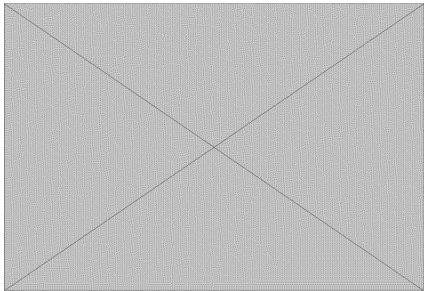

Thank you everyone for your patience around setting this up. Looking forward to hearing

from you.

OFFICE OF LINFORCEMENT & COMPLIANCE ASSURANCE

Re: Permitting Process and Environmental Review for Dakota Access Pipeline

Dear Col. Henderson, Col. Baumgartner, Col. Mitchell, Mr. Rodriguez, and Mr. McPeek:

Please accept this letter on behalf of Sierra Club, Sierra Club Iowa Chapter, Sierra Club Illinois Chapter, Chicago 350, 350Kishwaukee, Forest City 350, Elgin Green Groups 350, Sierra Club VOF, Fox Valley Citizens for Peace & Justice, Heartwood, Shawnee Forest Sentinels, Southern Illinoisans Against Fracturing Our Environment, Indigenous Environmental Network, Science and Environmental Health Network, Center for Biological Diversity, IOWA 350, and 350 Madison. We ask that it be included in the administrative record for all U.S. Army Corps of Engineer ("Corps") permit applications and Nationwide Permit ("NWP") verifications in your three Corps districts for the Dakota Access Pipeline, as well as any applications for permits or easements issued by the U.S. Fish and Wildlife Service ("USFWS").

The Dakota Access Pipeline LLC is proposing to build and operate a 30-inch diameter pipeline system that would transport up to 570,000 barrels per day of crude oil from the Bakken and Three Forks production regions of North Dakota 1,134-miles through North Dakota, South Dakota, Iowa and Illinois, terminating in Patoka, Ill. The pipeline project would require the clearing of a new permanent right-of-way through forests, wetlands and streams, communities, and areas of historical and cultural significance to Native American Tribes. It would involve significant environmental impacts, including risks of oil spills in ecologically, culturally, and economically important waterways. It would be a significant contributor to climate-altering greenhouse gas emissions, and would effectively "lock in" decades of additional reliance on fossil fuels that the United States has committed to phase out.

Like communities all along the pipeline route and elsewhere, our organizations are deeply concerned that the Corps and other agencies are proceeding with its regulatory responsibilities in violation of governing standards and without the close look that both the Clean Water Act ("CWA") and National Environmental Policy Act ("NEPA") require. For the reasons discussed below, continuation of the current segmented approach to permitting is likely to generate even more public concern, and result in litigation. We would like to schedule a conference with the responsible regulatory officials to discuss an alternative approach to permitting this project. Specifically, we request that the Corps take discretionary authority for any requested NWP verifications and piece-mealed individual permit applications for small segments of the project, and initiate a process for consideration of a single coherent application for all Corps authorizations deemed necessary under the Clean Water Act, R&H Act, et al., with accompanying NEPA review that evaluates all connected federal actions together.

A. Overview of Federal Involvement in the Dakota Access Pipeline

While the Pipeline is a private project, it needs extensive federal permitting (as well as numerous state and local permits). To the best of our current knowledge, the federal permits and approvals of the Dakota Access Pipeline include at least the following:

• The Corps' St. Louis District Office is evaluating a permit application under Section 14 of the Rivers and Harbors Act, 33 U.S.C. § 408 (commonly known as Section 408) for construction and burial of two segments of the pipeline beneath the Illinois River, Coon Run Levee, and McGee Creek Levee, and one segment beneath the Carlyle Lake flowage easement. This individual permit action triggers NEPA, and we understand that the

Corps is preparing an EA on this action. On January 5, 2016, the St. Louis office issued a Public Notice (#OD-R-15-009) indicating that it would accept public comment through February 5, 2016. Sierra Club and others submitted written comments on this notice.

- The Corps' Omaha Office is evaluating a separate individual permit application near the other end of the pipeline, in North Dakota. Specifically, the Corps is reviewing an application to cross lands that have federal flowage easements under management by the Corps at Lake Sakakawea and Lake Oahe. Because this action triggers NEPA review, the Omaha District has prepared a draft EA and sought comment on it. According to that draft EA, these crossings require individual permitting under § 404 of the CWA and/or § 10 of the Rivers and Harbors Act, in addition to a real estate easement and consent. EA at 3.
- The pipeline crosses three U.S. Army Corps of Engineers Districts: the Omaha District, Rock Island District, and St. Louis District. It is our understanding that permitting for the remainder of the 1,134 mile pipeline will proceed under the verification process outlined in NWP 12. We have submitted Freedom of Information Act requests seeking additional information on the verification process. As part of that process, the Corps is required to engage in consultation with the U.S. Fish and Wildlife Service ("FWS") pursuant to Section 7 of the Endangered Species Act ("ESA"), 16 U.S.C. § 1536(a)–(c) because construction and operation of the project will affect a number of listed species. Following consultation, the Corps must implement any resulting "incidental take statement" into its §404 permits or NWP 12 verifications.
- Separately, the USFWS must issue a special use permit ("SUP") for the pipeline to be constructed and operate in grassland and wetland easements managed by FWS in North Dakota and South Dakota pursuant to the National Wildlife Refuge System Administration Act of 1966, as amended (16 U.S.C. § 668dd-668ee). In compliance with NEPA, FWS released a draft Environmental Assessment in December 2015 to address potential impacts to the FWS wetland and grassland easements within the Project area.

B. The Corps' Segmented Process Is Inconsistent with the CWA

NWP 12 is intended to provide a streamlined approach to dealing with utility line projects that have minimal adverse environmental effects. Even where it applies, it places limits on what agencies can approve, and what they must consider, in authorizing projects. Several of those limits are implicated here.

1. Compliance with NWP 12 Standards: We are concerned that the Corps is not complying with its applicable standards for evaluation of a project under NWP 12. Very limited information has been made public to date. Only the Corps' Rock Island District has released a public notice announcing that Dakota Access Pipeline, LLC has requested verification of 17

crossings of regulated water bodies under NWP 12 in Iowa. No notices are available in North Dakota, South Dakota or Illinois.

As a threshold matter, even the limited information available raises significant concerns about its completeness. The Rock Island District's public notice identifies that 346 miles of pipeline will be laid in Iowa, but that the proponent has only sought verification for 17 regulated water bodies, including major river systems like the Missouri, Mississippi, and Illinois Rivers. It is extraordinarily difficult to believe that in 346 miles there are only regulated waters of the U.S. every 20 miles. By way of comparison, in the Flanagan South pipeline project, the Corps documented 1,950 crossings along the pipeline's 593 mile route (3.3 crossings per mile). The Gulf Coast Pipeline crossed over 2,000 waterways in 485 miles. *Sierra Club v. Bostick*, 787 F.2d 1043 (10th Cir. 2015); *see also* FWS EA, at 7, 17 (pipeline will cross 146 wetland segments in 272 miles in South Dakota). Waters of the U.S. include all waters that are, were, or "may be susceptible" for use in commerce, including lakes, rivers, streams (including intermittent streams), wetlands, wet meadows, and prairie potholes. 33 C.F.R. § 328.3. The Corps must ensure that the proponent is providing complete and accurate information, and the idea that there are only 17 regulated waters in nearly 350 miles of Iowa should be treated with skepticism.

Even if NWP 12 applies and is correctly invoked, it nonetheless requires substantial process and analysis. Preconstruction notice is required for the project under the terms of NWP 12. The District Engineer is obligated to review whether the activity will "result in more than minimal individual or cumulative adverse environmental effects or may be contrary to the public interest." 77 Fed. Reg. 10184, 10287 (Feb. 12, 2012). For linear projects like pipelines, the direction is even more explicit: in addition to ensuring that each crossing satisfies the terms of the NWP, the Corps is obligated to look at "the cumulative effects caused by all of the crossings authorized by" the NWP, including both "direct and indirect" effects. The rule continues:

The district engineer will also consider site specific factors, such as the environmental setting in the vicinity of the NWP activity, the type of resource that will be affected by the NWP activity, the functions provided by the aquatic resources that will be affected by the NWP activity, the degree or magnitude to which the aquatic resources perform those functions, the extent that aquatic resource functions will be lost as a result of the NWP activity (e.g., partial or complete loss), the duration of the adverse effects (temporary or permanent), the importance of the aquatic resource functions to the region (e.g., watershed or ecoregion), and mitigation required by the district engineer. If an appropriate functional assessment method is available and practicable to use, that assessment method may be used by the district engineer to assist in the minimal adverse effects determination.

77 Fed. Reg. at 10287-88. If the effects are determined to be "more than minimal," the district engineer is required to notify the applicant to either proceed under an individual permit or to modify the project to render impacts minimal. *Id.* This analysis is an independent duty imposed

¹ Rock Island District Public Notice, at 2, available at http://www.mvr.usace.army.mil/Portals/48/docs/regulatory/publicnotices/DAKOTA%20ACCESS%20PI PELINE.pdf.

by the CWA itself, and is required regardless of the separate question (discussed below) of NEPA compliance.

In order to qualify for coverage under NWP 12, Dakota Access Pipeline must also comply with numerous general conditions. For example, "no activity may occur in the proximity of a public water supply intake". General Condition #7. While some courts have held that the Corps need not conduct an independent investigation to ensure compliance with this and other general conditions, there is credible evidence before the Corps that this standard is *not* satisfied. We lack confidence at this time that the proponent has ensured that none of the other countless river and stream crossings of this project will occur in proximity to a public water supply.

In fact, according to comments filed by the Standing Rock Sioux Tribe on Jan. 8, 2016, the North Dakota portion of the project will cross in proximity to the Tribe's primary public water supply as well as water supply for numerous individuals.

On March 8, 2016, the U.S. EPA Region 8 office sent a letter to the Corps voicing its concern of the pipeline's close proximity to drinking water supplies and the potential for oil spills or leaks to contaminate them. Specifically, EPA noted that the pipeline would be located immediately upstream of the drinking water intakes for the Fort Yates, Standing Rock Reservation water system, the main Standing Rock Reservation drinking water system, water intakes for a tribal irrigation project, as well as individual drinking water wells located along the Missouri River. EPA further stated that the Mobridge, South Dakota and Williston, North Dakota drinking water intakes are located less than 20 miles downstream, and that the Missouri River is used as the drinking water supply for much of western South Dakota and five Tribal Nations (the Cheyenne River, Crow Creek, Oglala, Rosebud and Lower Brule Sioux Tribes) as well as the Mni Wiconi Rural Water System that provides drinking water to the Pine Ridge, Rosebud, and Lower Brule Reservations as well as the West River/Lyman Jones Water District. The EPA was concerned that there would be too little time to determine whether a leak was occurring and to notify the water treatment facilities, and urged the Corps to prepare a revised EA that discussed potential impacts to downstream water supplies and include the water systems in emergency preparedness planning.

Similarly, the NWP cannot "impair reserved tribal rights," General Condition #17, or impair historic properties without full compliance with the National Historic Preservation Act ("NHPA"). General Condition #20. Serious concerns have been raised with respect to both already, even without adequate public information.

Perhaps the most robust of the general conditions is that verification cannot proceed without full compliance with the substance and procedures imposed by the Endangered Species Act ("ESA"). General Condition # 18. This project potentially affects several listed species, and we understand that ESA consultation is ongoing.

Historically, NWPs were not used for major pipelines like this one. In its January 8, 2016 comment letter on the Dakota Access EA, the U.S. Environmental Protection Agency ("EPA") noted that the Corps has a history of analyzing full pipelines in accordance with the individual permit process rather than under NWP 12. For example, it analyzed the entire length of both the

Bakkenlink and Sacagawea pipeline projects as individual permits. Similarly, the Corps' Mobile, Savannah, and Jacksonville District offices are currently evaluating the proposed Sabal Trail gas pipeline under the individual permit process, and preparing a NEPA analysis that evaluates the overall project. See also Stop the Pipeline v. White, 233 F. Supp. 2d 957, 961-63 (S.D. Ohio 2002) (the Corps began evaluating a 149-mile oil pipeline under NWP 12, but decided to evaluate the entire pipeline under the individual permit process because the impacts were more than minimal); Sierra Club v. Clinton, 746 F. Supp. 2d 1025, 1029 (D. Minn. 2010) (Corps prepared individual § 404 permit for Alberta Clipper pipeline in Minnesota and Wisconsin). Indeed, EPA has repeatedly objected to the Corps' use of NWP 12 to approve large interstate oil pipelines without any NEPA review or public review process. For example, the EPA objected to the use of NWP 12 in the approval of both the Enbridge Flanagan South Pipeline and the TransCanada Gulf Coast Pipeline, urging an individual permit process instead.

In sum, NWP 12 is not suitable for the Dakota Access Pipeline. The Corps should take discretionary authority on the requested verifications and proceed under the individual permit process for the entire single and complete project. The Corps must have a sufficient factual basis on which to make a reasoned determination that the project's individual and cumulative effects are minimal. It must evaluate that information and reach—and explain—its decision with support in an administrative record. We are deeply concerned that the Corps is failing to go through the process required by the NWP and its conditions. For example, because the review is taking place in three separate Corps district, there appears to be no mechanism by which the Corps can consider the cumulative effects of the pipeline as a whole, as the law requires. Given the potential for significant adverse impacts to the aquatic environment, as well as the extraordinary length and capacity of this pipeline, the public outcry, and its potential risks, we believe that the mandatory review of the pipeline's many crossings should result in a finding that an individual permit is required.³ Without the individual permit process, the requisite public interest review evaluation and the Corps' ability to determine compliance with the section 404(b)(1) guidelines would be insufficient/flawed.

- 2. Prohibition on combining individual permits with NWPs: Army Corps' regulations put limits on the Corps' ability to combine individual permits with NWPs for a single project. The applicable regulation reads as follows:
 - (d) Combining nationwide permits with individual permits. Subject to the following qualifications, portions of a larger project may proceed under the authority of the NWPs while the DE evaluates an individual permit application for other portions of the same project, but only if the portions of the project qualifying for NWP authorization would have independent utility and are able to function or

² http://content.sabaltrailtransmission.com/resources/2015-supplemental/appendix-e/00-Sabal Trail Supplemental APP-E VOL-IV.pdf

³ Even if individual review wasn't required, the Corps' retains discretionary authority to deny authorization under a NWP where there are concerns for the aquatic environment "or for any factor of the public interest." 33 C.F.R. § 330.1(d); see also § 300.4(e). Such a denial is appropriate where the District Engineer finds that the activity would have "more than minimal individual or cumulative net adverse effects". *Id.* This is precisely such a situation.

meet their purpose independent of the total project. When the functioning or usefulness of a portion of the total project qualifying for an NWP is dependent on the remainder of the project, such that its construction and use would not be fully justified even if the Corps were to deny the individual permit, the NWP does not apply and all portions of the project must be evaluated as part of the individual permit process.

(1) When a portion of a larger project is authorized to proceed under an NWP, it is with the understanding that its construction will in no way prejudice the decision on the individual permit for the rest of the project. Furthermore, the individual permit documentation must include an analysis of the impacts of the entire project, including related activities authorized by NWP.

33 C.F.R. § 330.6(d) (emphasis added).

By proceeding with its review of the Pipeline with two individual permits and a series of NWP 12 verifications, all reviewed by separate Corps districts, the Corps appears to be in violation of this standard. As noted above, the draft EA for the North Dakota flowage easements explicitly states that an individual permit will be required as part of that project segment. The limitation applies also to the § 408 individual permit being considered by the Illinois District. Individual permits within the meaning of this regulation include not just permits issued under § 404 of the CWA and § 10 of the RHA, but also § 408 permits. See 33 C.F.R. § 320.3(e) (discussing authority to issue § 408 permits as part of Corps' general regulatory program); § 320.4; pt. 325 (§ 408 permits are treated like all other permits for purposes of the Corps' public interest review and other general policies).

Moreover, it is self-evident that the various components of the pipeline do not have "independent utility" without the pipeline as a whole: a small segment of pipeline crossing federal flowage easements or federal levees does not meet the purpose and need for this project or any conceivable variant of it. See, e.g., Crutchfield v. U.S. Army Corps of Engineers, 154 F. Supp.2d 878 (E.D. Va. 2001) (Corps cannot process portion of wastewater treatment plant project under NWP because it did not have independent utility from rest of project); Ohio Valley Environmental Coalition v. Bulen, 315 F. Supp.2d 821, 829 (S.D.W.Va. 2004) (enjoining Corps from verifying segment of project under NWP while it was considering individual permit for project as a whole).

Even if such an approach was permissible—which it is not—the documentation for the individual permit components would have to include an "analysis of the impacts of the entire project," *i.e.*, the pipeline as a whole. 33 C.F.R. § 330.6(d)(1). Such analysis is missing from

⁴ Even if the NWPs were not part of the project, the submission of two different permit applications for the two individual components of the pipeline is also not allowed. See 33 C.F.R. § 325.1(d)(2) ("All activities which the applicant plans to undertake which are reasonably related to the same project and for which a DA permit would be required should be included in the same permit application.") This regulation applies to applications for "any" Department of the Army permit, i.e., it includes both § 404 and § 408 permits. Id. § 325.1(a).

the EA for the flowage easement in North Dakota, and the public notice for the levee crossings in Illinois.

In sum, the Corps' own regulations explicitly prohibit it from processing individual permits—including both individual §404/§10 permits as well as § 408 authorizations—while simultaneously verifying compliance with NWP 12 for this project. The verification requests and individual permits for small segments must be denied, and the Corps should process all of the pipeline's impacts to waters of the United States in a single permit.

C. The Corps and the USFWS are not in Compliance with NEPA

For the reasons discussed above, the Corps must abandon the verification process under NWP 12 and proceed with an analysis of the pipeline as a whole under a single individual §404 permit. Issuance of a single permit for the pipeline as a whole would be a major federal action subject to NEPA, and a full Environmental Impact Statement ("EIS") all but certain due to the significance of the project's overall environmental impacts. This is the process that the law requires, and the one that the public deserves for a project of this scale.

However, even if the Corps were to proceed (in our view, unlawfully) on the basis of combined individual permits for components of the project, and NWP 12 review for the remainder, additional NEPA analysis will be required. Such analysis will necessarily have to look at the indirect and cumulative effects of the federal components of the project before permitting can proceed.

1. The agencies must analyze all connected actions together

At a very minimum, the Corps and other agencies with permitting oversight over this project must evaluate all connected federal actions (i.e., the portions of the pipeline that are within federal jurisdiction) in a single EA or EIS. NEPA requires federal agencies to analyze a project and all of its connected, cumulative, and similar actions together in a single EA or EIS before the project is allowed to proceed. 40 C.F.R. § 1508.25(a). Connected actions are defined as actions that: "(ii) Cannot or will not proceed unless other actions are taken previously or simultaneously; or (iii) Are interdependent parts of a larger action and depend on the larger action for their justification." 40 C.F.R. § 1508.25 (a)(1) (emphasis added).

Courts have allowed individual components of pipelines and other linear projects to be analyzed in a separate NEPA document only if they would have "independent utility." *Hammond*, 370 F. Supp. 2d at 244 (applying the independent utility test and holding that an entire 480-mile oil pipeline must be analyzed in a single NEPA document); *Coal. on Sensible Transp., Inc. v. Dole*, 826 F.2d 60, 69 (D.C. Cir. 1987) (applying the independent utility test to a highway project).

In Delaware Riverkeeper Network v. F.E.R.C., 753 F.3d 1304 (D.C. Cir. 2014), the court held that the Federal Energy Regulatory Commission's (FERC's) Environmental Assessment (EA) for a 40-mile natural gas pipeline project called the Northeast Project violated NEPA by failing to include all connected actions pursuant to 40 C.F.R. § 1508.25(a). The court held that the Northeast Project was actually one of four "physically, functionally, and financially

connected and interdependent" components that resulted in a complete overhaul of a 200-mile pipeline, and that FERC had improperly segmented its NEPA analysis. *Delaware Riverkeeper*, 753 F.3d at 1308.

Some federal agency representatives involved in the Dakota Access Pipeline have implied that D.C. Circuit's recent decision in *Sierra Club v. U.S. Army Corps of Engineers*, 803 F.3d 31 (D.C. Cir. 2015) limited the Corps' NEPA obligations with respect to oil pipelines. However, the court there actually declined to rule on the connected and cumulative action issues on procedural grounds. Those obligations remain applicable here.

The facts of the Flanagan South case are in many respects similar to this case. There, Enbridge proposed the 600-mile Flanagan South pipeline to be constructed through Illinois, Iowa, Missouri, and Oklahoma. The pipeline required multiple levels of federal approval, many of which are also involved in this case: multiple Corps offices verified the pipeline's water crossings pursuant to NWP 12; the Corps consulted with the FWS pursuant to ESA Section 7 and ultimately implemented the incidental take statements via the verification decisions; and the Corps and BIA prepared three separate EAs for the pipeline's crossings of federal properties. *Id.* at 38-42. However, no agency prepared any NEPA analysis that covered all of these connected federal actions together, let alone the entire pipeline. Sierra Club and other groups challenged the agencies' segmented approval of Flanagan South under NEPA.

When Sierra Club and other Plaintiffs first brought their "segmentation" claims alleging violations of 40 C.F.R. § 1508.25, the Corps had already verified the water crossings under NWP 12 and allowed construction to begin, but neither the Corps nor the BIA had finalized their EAs for the federal easements. Therefore, the district court held that any claims relating to the easements EAs were not yet ripe, and refused to apply 40 C.F.R. § 1508.25 since there had not yet been final agency action to which it could be applied.

Once the Corps and the BIA did finalize the EAs and approve the easements, Plaintiffs moved to amend their complaint to challenge the sufficiency of the EAs pursuant to 40 C.F.R. § 1508.25. The district court denied the motion to amend on the grounds of futility, and entered summary judgment in favor of the federal defendants. On appeal, the D.C. Circuit also avoided addressing whether 40 C.F.R. § 1508.25 required all of the connected *federal* actions to be analyzed together in a single NEPA document, reasoning that Plaintiffs had not properly raised that argument in the district court:

Sierra Club has failed to preserve its claim that the several easement actions, verifications and ITS, taken together, amount to a single federal action that requires its own NEPA analysis. We assume *arguendo* that the Corps' and Bureau's discrete easement actions and verifications incorporating the ITS were all component parts of the same federal action, but Sierra Club has failed to preserve an argument that the government was required to perform a unified NEPA analysis on anything less than the entire Flanagan South pipeline.

Sierra Club, 803 F.3d at 48-49.

Thus, plaintiffs never had an opportunity to properly assert the claim that all component federal approvals of the single oil pipeline, all of which trigger NEPA, must be analyzed together pursuant to 40 C.F.R. § 1508.25. We raise it now with respect to this pipeline, which suffers from the identical flaw. Because no section would have independent utility, all of the federally-approved parts of the pipeline are "connected actions" that must be analyzed together. Even if the majority of the project could proceed under a NWP, which we dispute, the Corps and US FWS cannot issue three separate NEPA documents for individual segments of one overall project. The agencies should withdraw the EAs, and proceed with a single NEPA analysis on all of these components which includes consideration of all direct, indirect and cumulative effects.

2. The agencies must analyze all cumulative actions together

A separate but distinct question of scope is whether any of the "non-federal" sections of the Dakota Access pipeline (*i.e.*, those portions of the project that do not require permits or authorization by a federal agency) must be analyzed in the same NEPA analysis. The law is equally clear on this issue.

In addition to "connected actions" discussed above, the scope of a NEPA analysis must also include cumulative actions, "which when viewed with other proposed actions have cumulatively significant impacts and should therefore be discussed in the same impact statement." 40 C.F.R. § 1508.25(a)(2). Cumulative effects, in turn, are defined as "the impact on the environment which results from the incremental impact of the action when added to other past, present, and reasonably foreseeable future actions regardless of what agency (Federal or non-Federal) or person undertakes such other actions. Cumulative impacts can result from individually minor but collectively significant actions taking place over a period of time." 40 C.F.R. §1508.7.

Thus, the obligation to consider cumulative effects is not limited to actions taken by a particular agency. An agency is required by 40 C.F.R. §1508.7 to consider the cumulative effects of actions taken by other agencies, and in fact other actions not subject to NEPA at all. See, e.g., Grand Canyon Trust v. FAA, 290 F.3d 339, 345 (D.C. Cir. 2002) (the FAA's EA for an airport expansion had to analyze the cumulative increase in air traffic from other sources in the area).

In the Flanagan South decision, the D.C. Circuit acknowledged that the "cumulative actions" doctrine "prevents agencies from ignoring the environmental effects of other actions, without regard to whether their author was federal, because those effects set the baseline state of affairs and thus the context in which the significance of proposed federal action must be evaluated." Sierra Club, 803 F.3d at 51.

Nonetheless, the court again refused to apply the cumulative action/impact regulations, finding that Sierra Club had failed to properly argue for anything less than a pipeline-wide review (i.e., that the entire pipeline was a "major federal action"). *Id.* ("Sierra Club's argument is not, however, that the agencies' NEPA analyses ignored the environmental impacts of cumulative actions on discrete swaths of the pipeline, but that they failed to analyze the entire length of the pipeline.).

However, in *Delaware Riverkeeper*, after determining the various section of the pipeline project were connected actions, the court found that FERC was required to analyze all of the pipeline sections together as cumulative actions. The court discussed the requirements of 40 C.F.R. § 1508.7 and held:

It is apparent that FERC did not draft these pages with any serious consideration of the cumulative effects of the other project upgrades on the Eastern Leg of the 300 Line. In light of the close connection between the various sections of the line that have been upgraded with new pipe and other infrastructure improvements, FERC was obliged to assess cumulative impacts by analyzing the Northeast Project in conjunction with the other three projects.

Delaware Riverkeeper, 753 F.3d at 1320. .

Therefore, in addition to the "connected actions" issue as described above, all sections of the pipeline requiring federal approval must be analyzed together in a single EIS as cumulative actions pursuant to 40 C.F.R. § 1508.25(a)(2); and/or as projects that would have cumulative impacts pursuant to 40 C.F.R. § 1508.7. In addition, all of the non-federal components of the Dakota Access Pipeline- that is, the sections that fall outside of federal jurisdiction must also be analyzed in a single EA or EIS pursuant to 40 C.F.R. § 1508.25(a)(2) and 40 C.F.R. § 1508.7.

3. Implementation of Endangered Species Act requirements triggers NEPA

Regardless of whether the Corps evaluates the pipeline under an individual or nationwide permit, it must prepare a NEPA analyses if/when it consults with FWS pursuant to ESA §7 and implements an incidental take statement.

The ESA requires most decisions, such as whether to list a species, to be based "solely on the basis of the best scientific and commercial data available to [the Service]... [.]" 16 U.S.C. § 1533(b)(1)(A). Thus, NEPA is usually inapplicable. However, as described below, the Corps is required to comply with NEPA when it approves an oil pipeline projects that will "take" listed species.

The ESA requires federal agencies, through consultation with the United States Fish and Wildlife Service, to "insure that any action authorized, funded, or carried out by the agency . . . is not likely to jeopardize the continued existence of any listed species or adversely modify its critical habitat. 16 U.S.C. § 1536(a)(2). "Action" is defined to include all activities or programs of any kind authorized, funded, or carried out by federal agencies, including actions directly or indirectly causing modifications to the land, water, or air. 50 C.F.R. § 402.02. An agency must initiate consultation with the Service whenever it takes an action that may affect a listed species, subject to limited exceptions. 50 C.F.R. § 402.14(a).

The result of the interagency consultation process is a biological opinion that evaluates impacts to listed species to determine if the action is likely to jeopardize the species' existence or adversely modify critical habitat. If the conclusion of the opinion results in a determination of jeopardy or adverse modification, then the opinion identifies changes to the action to avoid these

effects. 16 U.S.C. § 1536(b). The Service may also issue, along with the biological opinion, an incidental take statement, which provides for a specified level of "incidental take" of listed species in connection with the proposed action. 16 U.S.C. § 1536(b)(4).

Under the Endangered Species Act, "take" of listed species—broadly defined, under 16 U.S.C. § 1532(19) and 50 C.F.R. § 17.3, to cover a variety of harm to or harassment of species or destruction of their habitat—is generally prohibited. See 16 U.S.C. § 1538(a)(1)(B). Despite this prohibition, incidental take statements authorize a limited and specified amount of take that is incidental to an action conducted by a federal agency or applicant for federal authorization. Incidental take is defined as take that does not jeopardize a species' continued existence or adversely modify its critical habitat and that "result[s] from, but [is] not the purpose of, carrying out an otherwise lawful activity conducted by the Federal agency or applicant." 50 C.F.R. § 402.02; see also 16 U.S.C. § 1536(b)(4)(B).

The incidental take statement identifies "reasonable and prudent measures" that the Service considers "necessary or appropriate" to minimize the impacts of the proposed action on listed species. 16 U.S.C. § 1536(b)(4)(ii). The statement also "sets forth the terms and conditions . . . that must be complied with by the Federal agency or applicant (if any), or both" in order to implement the reasonable and prudent measures identified. 16 U.S.C. § 1536(b)(4)(iv). The statement thus allows the agency with which the Service consults, as well as the project proponent, to avoid violations of the Endangered Species Act in connection with incidental taking that occurs during agency-sanctioned project activity.

In Sierra Club v. U.S. Army Corps of Engineers, the court held that while the FWS' issuance of a biological opinion and incidental take statement was not major federal action triggering NEPA in and of itself, "the Corps' implementation of the ITS was federal action." 803 F.3d at 45. The court explained:

The Service's issuance of the ITS was not the functional equivalent of a permit, but the Corps' incorporation of the ITS was. When the Service issues an ITS in its consultative role, Enbridge correctly notes, it "do[es] not allow or authorize (formally permit) incidental take under section 7." Enbridge Br. 38 (quoting Section 7 Handbook, *supra*, at x). ... It was only when the Corps formally incorporated the ITS into its Clean Water Act verifications that it gave Enbridge permission to take species free from the threat of ESA liability. The Corpsimplemented ITS is the functional equivalent of a permit and thus constitutes federal action subject to NEPA. See 40 C.F.R. § 1508.18(b)(4).

Sierra Club, 803 F.3d at 45-46.

Authorizing take of endangered species in connection with pipeline construction and operation across jurisdictional waters, and doing so only on the conditions that Enbridge take mitigating conservation measures and monitor species impact for the anticipated useful life of the pipeline, was regulatory approval amounting to significant federal action requiring environmental review under NEPA. See 40 C.F.R. § 1508.18(b)(4); see also San Luis, 747 F.3d at 642–45; cf. Tenn. Valley, 437 U.S. at 172–73, 98 S.Ct. 2279 (reflecting that, although "[i]t may seem

curious to some that the survival of a relatively small number of three-inch fish ... would require the permanent halting of a virtually completed dam for which Congress has expended more than \$100 million," the plain language of the ESA "require[d] precisely that result").

Id. at 46.

In short, even if verification that the Pipeline meets the standards of NWP 12 by itself does not trigger a full NEPA review, implementation of the incidental take statement—which authorizes the proponent to kill or injure endangered species—transforms the verification into a major federal action with significant environmental effects that is subject to NEPA. We understand that Dakota Access Pipeline, LLC is continuing consultation for federally threatened and endangered species under Section 7 with local FWS field offices in North Dakota, South Dakota, and Illinois. The FWS' Rock Island Ecological Services Field Office is the lead for federally listed species for the entire Dakota Access Project.⁵

While there has been no public process and thus the status of the Section 7 process remains unclear, the Corps must prepare NEPA analyses prior to, and in connection with, any implementation of an incidental take statement into a §404(a) permit or NWP 12 verification.

Finally, the ESA Section 7 consultation process covers only areas within Corps jurisdictional waters. As the Flanagan South court acknowledged, if Dakota Access Pipeline wishes to take any listed species outside of Corps jurisdictional areas, it must obtain a separate "incidental take permit" (ITP) under Section 10 of the ESA. Sierra Club v. U.S. Army Corps of Engineers, 803 F.3d 31, 45-46 (D.C. Cir. 2015). The FWS' issuance of an ITP that allows "take" of species constitutes major federal action requiring a NEPA analysis. Id.

4. The agencies must choose a lead agency

If one or more federal agencies are "involved in the same action" or are "involved in a group of actions directly related to each other because of their functional interdependence or geographical proximity," a lead agency "shall supervise the preparation of an environmental impact statement." 40 C.F.R. §1501.5(a)(emphasis added). "[T]he potential lead agencies shall determine by letter or memorandum which agency shall be the lead agency and which shall be cooperating agencies." 40 C.F.R. §1501.5(b)(emphasis added).

Here, multiple federal agency offices are "involved in the same action" – the approval of Dakota Access Pipeline- and/or are "involved in a group of actions directly related to each other because of their functional interdependence or geographical proximity." Therefore, they must choose a lead agency to coordinate their NEPA reviews.

In addition, President Obama signed into law on December 4, 2015, the Fixing America's Surface Transportation ("FAST"). FAST applies to activities "involving construction of infrastructure for renewable or conventional energy production, ... surface transportation, ... [or]

⁵ FWS EA, at 20.

pipelines ..."⁶ Covered projects include those that are likely to exceed \$200,000,000 in construction costs, and the project must trigger NEPA and be of a "size and complexity" such that "in the opinion of the Council . . . the project [is] likely to benefit from enhanced oversight and coordination . . ." *Id*.

Among other things, the FAST Act requires the identification of a lead / facilitating agency to coordinate the NEPA review of pipeline projects. The lead agency must: (a) identify all Federal and non-Federal agencies and governmental entities likely to have financing, environmental review, authorization, or other responsibilities with respect to the proposed project and invite them to become participating/cooperating agencies in the environmental review/authorization management process; (b) maintain a "permitting dashboard," which is an online searchable database to track the status of environmental reviews/authorizations for covered projects; (c) post links to the applications and supporting documents, and a description of any Federal agency action taken or decision made that materially affects the status of a covered project; and (d) consult with any coordinating/participating agencies to establish a concise plan (Coordinated Project Plan) for coordinating public and agency participation in, and completion of, any required Federal environmental review/authorization for the project.⁷

Thus, the FAST Act requires a higher degree of agency coordination in pipeline reviews than what the Corps and other agencies are demonstrating with Dakota Access. The agencies should pause their reviews to ensure compliance with the letter and intent of the FAST Act, and must choose a lead agency to coordinate a NEPA review.

5. The Corps and other agencies have been repeatedly urged to coordinate their NEPA processes

To date, there has been no meaningful opportunity for the public to comment on an environmental review of any significant portion of the Dakota Access Pipeline. Nonetheless, the US EPA and many of the undersigned groups have repeatedly raised these concerns in the few comments periods that were offered.

On January 8, 2016, the US EPA Region 8 office commented on the Corps' Draft EA for the Dakota Access Pipeline in North Dakota, and complained that the EA's scope was improperly limited to small portions of the complete project and failed to evaluate the impacts of the related federal and non-federal parts of the entire pipeline segment as NEPA requires. The EPA urged the Corps to evaluate, among other things, impacts to water crossings that also come under the Corps' jurisdiction; the environmental impacts of constructing and operating six terminals stations/tank farms and other connected parts of the pipeline; and the impacts posed by crude oil spills during operation and mitigation and response measures.

On March 11, 2016, the EPA Region 8 sent additional comments to the Corps, raising additional concerns about the pipeline's potential impacts to the Standing Rock Sioux Tribe Reservation as well as oil spills impacting water resources. The EPA recommended the

⁷ *Id*.

⁶ http://transportation.house.gov/uploadedfiles/fastact_xml.pdf.

preparation of a new NEPA analysis covering oil spill planning and emergency response capabilities along the entire length of the pipeline, including all waterways along the pipeline route.

The undersigned groups have also objected to the segmented federal review of Dakota Access Pipeline, and have urged a coordinated federal review process pursuant to NEPA and the NHPA. On January 18, 2016, the Shawnee Forest Sentinels, Southern Illinoisans Against Fracturing Our Environment, and Heartwood submitted comments to the US FWS EA, arguing that the agencies have improperly limited the scope of the environmental analysis in violation of 40 C.F.R. § 1508.25, and must consider the climate impacts and impacts to water resources of all connected and cumulative actions.

On January 8, 2016, the Standing Rock Sioux Tribe commented on the Corps' EA for the crossing of flowage easements and federal lands. Among other things, the Standing Rock Sioux Tribe argued that the Corps had failed to adequately consult with the tribe as required by Section 106 of the NHPA, and had failed to prepare a more comprehensive NEPA analysis that evaluated impacts to cultural resources, impacts of oil spills, and environmental justice issues. On February 9, 2016, the Standing Rock Sioux Tribe sent similar letters to the U.S. EPA and President Barack Obama.

On February 5, 2016, the Sierra Club, the Sierra Club Illinois Chapter, Sierra Club Iowa Chapter, 350Kishwaukee, Southern Illinoisans Against Fracturing Our Environment, Shawnee Forest Sentinels, and Heartwood submitted comments in response to the Corps' Public Notice (#OD-R-15-009) for a Section 408 permit for Dakota Access, objecting to the segmented federal approval of Dakota Access.

In sum, the Dakota Access Pipeline is a major federal action requiring thorough review and analysis under the CWA and NEPA. We respectfully request that the three district offices of the Corps deny the requested individual permits and request for verifications under NWP 12, and initiate a process for issuance of a single individual permit for the project as a whole, with accompanying analysis. Given the size, scale, environmental risks and controversy of this project, the law requires—and the public deserves—no less.

Subject: Approaching Sell Out - 2016 #WVBrownfields Conference and CABF Summit

Hello All,

We are getting a great response to registration for this year's WV Brownfields Conference and Central Appalachian BF Summit. On that note, we expect to be sold out by COB on Monday, August 15. If you plan to attend and have not yet registered, I would so as soon as possible.

http://wvbrownfields.org/2016-wv-brownfields-conference-registration/

Additionally, Monday is the last day that you can reserve a room at the Marriott at the conference rate. We have made arrangements with the Holiday Inn Express – Charleston Civic Center for additional rooms at \$109/night. The Holiday Inn is within walking distance to the Marriott, about two blocks. Below is the phone number for both the Charleston Marriott Town Center and the Holiday Inn.

Charleston Marriott Town Center – (304) 345-6500

Holiday Inn Express Charleston Civic Center – (304) 345-0600

Best regards,

Subject: Resilience Panel at Central Appalachian Regional Brownfields Summit

2016 Brownfields Conference Speaker Guidelines.docx

Bill,

Thanks for your interest in speaking on resiliency at the Central Appalachian Regional Brownfields Summit. During the panel, we hope to cover resilience as it relates to disruptions from both natural and economic disruptions. We are particularly looking for you to speak on developing resilient communities from a grassroots/citizens perspective.

As I am emphasizing to all participants, we are trying to have a diverse panel, but we are hoping to keep everyone civil, looking towards a common goal of improving the region, rather than attacking or blaming others.

I have attached a copy of the speaker guidelines to help you prepare for your presentation. Please send me a short, one paragraph biography.

Thank you,

Herb Petitjean
Brownfield Coordinator

2016 West Virginia Brownfields Conference & Central Appalachian Regional Brownfields Summit September 7-8, 2016

Speaker Guidelines

Thank you for serving as a speaker at the 2016 WV Brownfields Conference & Central Appalachian Regional Brownfields Summit. This document outlines the information and expectations for speakers, including what you should expect before, during, and after the conference. If you have any questions about the information below, or other questions about the conference, please contact a member of the planning committee. Contact information for these contacts can be found on the final page of this document.

Before the Conference

Before the conference you will be contacted by a member of the planning committee and/or your Session Moderator. Any questions about the event can be directed to either of these contacts, who will work together to make sure you have all of the necessary information leading up to the conference. Before the conference, your planning committee member or your Session Moderator will contact you with:

- A request for biographical or other information needed for introductions;
- A request for your preferences for presentation order;
- Further information on how much time will be allotted for your presentation, which will include the time it takes to introduce you, as well as a question /answer period; and
- Additional information on how to share your PowerPoint Presentation and/or handouts.

PowerPoint Presentations

Although PowerPoint presentations are not required, they are common. If you do use a PowerPoint presentation for your session, please make sure it gets saved to the provided laptop in the designated folder so it can be shared with participants after the Conference. Below are some tips on how to make your PowerPoint most effective for audience participants.

- For headlines, use 28 font size or larger.
- For text, use 18 font size or larger.
- Use color combinations that are dark and legible.
- Use simple fonts (e.g. Arial) that are easy to read.
- Rule of thumb: If you cannot read text on your computer screen from a distance of ten feet, we will NOT be able read it from the back of the room.

If you are planning to provide a handout for your session, please plan for enough copies for 50-60 participants. Please be sure to register for the conference at: http://wvbrownfields.org/2016-wv-brownfields-conference-registration/ at the discounted speaker rate so that we can have a proper headcount and registration information. If you need a hotel room for the event, please be sure to reserve a room early and mention that you are with the WV Brownfields Conference to receive the conference rate. Lodging details can be found at the Conference Website.

Session Descriptions

Your session description will be posted on the Conference website to allow attendees to plan their schedule in advance. You will also be provide with a session description to ensure that your presentation complements the other speakers on the panel. The planning committee prepares copies for the programs and other conference materials based on the finalized session descriptions, and any edits must be finalized well in advance of the event.

Day of the Conference

Session Location and Audio Visual Equipment

Specific times and room assignments will be shared once the agenda is finalized. Each session room will have an LCD projector, laptop, screen, and two microphones. If you would like to request additional audio visual equipment, please let Carrie Staton (carrie.staton@mail.wvu.edu) know as quickly as possible so that this can be arranged with the venue staff.

Conference staff will be assigned to each room to assist with A/V equipment and loading presentations on the laptop. Familiarize yourself with the microphone, pointer, lights, and immediately inform conference staff of any difficulties you might encounter.

Audience

In the past, the WV Brownfields Conference has had attendance of between 150-200 participants with a variety of backgrounds and interests. The Centers anticipate attendance to reach more than 200 attendees in 2016, including:

- Developers,
- Community members,
- Local, state, and federal government officials, and
- Other professionals from around West Virginia and Central Appalachia.

At the end of the session, your session moderator will ask attendees to fill out session evaluation forms, which will be shared with the planning committee, who will compile and return any feedback to you following the conference.

After the Conference

After the conference, we will share all PowerPoint presentations on the Conference website. Please be sure to share a final version of your presentation with BAC staff before leaving the event, or via email to Andrew Stacy at charles.springston@mail.wvu.edu.

Your observations and insight are important for planning future conferences. Please take a moment to let us know how your session went and provide suggestions for how we may improve things in the future. Your comments would be appreciated by October 14th, 2016 and may be sent by e-mail to: carrie.staton@mail.wvu.edu.

Conference

Hi Alyssa,

I reached out to Bill Price, who was at the meeting in DC, and he is interested in being on this panel! I have cc'd him here so that you all can work out details, and in case he has any questions for you.

Thank you for including us in the planning of what seems to be a great event!
Lyndsay
On Mon, Jul 11, 2016 at 10:12 AM, Edwards, Alyssa < edwards.alyssa@epa.gov > wrote: Hi Lyndsay,
I hope you had a great weekend. We are helping put together a panel session at the September Central Appalachia Brownfields Conference focused on economic resiliency. Might you have any thoughts on suggested panelist who can speak from a community-based organization perspective? I was thinking that perhaps one of the organization representatives from your attendee list from the meeting with OEJ might be an option? Here is the draft session description:
Community Resilience: Building Communities that Can Survive and Thrive
Description – "Resilience" comes from a Latin word meaning "to leap back," like a boxer who gets back up after being knocked down. Can your community get back up when it is hit by economic changes or a natural disaster? In this session, our panelists will discuss ways towns can create economies that are less susceptible to economic disruptions and neighborhoods that are less vulnerable to extreme weather events.
Looking forward to your feedback and thanks as always for your support!
All my best, Alyssa

On Wed, Apr 15, 2015 at 3:08 PM, Gogal, Danny < Gogal. Danny@epa.gov > wrote:

Dear Indigenous Peoples/Communities Representatives and Interested Indigenous Stakeholders:

The U.S. Environmental Protection Agency (EPA or Agency) is developing a framework for the EJ 2020 Action Agenda (EJ 2020). EJ 2020 will help EPA advance environmental justice through its programs, policies and activities, and will support our cross-agency strategy on making a visible difference in environmentally overburdened, underserved, and economically distressed communities, including tribal and other indigenous peoples' communities. EPA invites you to provide input on the draft framework for EJ 2020 and participate in the Agency's planned public webinars on the framework during the public comment period April 15 through June 15, 2015. Please note that a separate tribal consultation and coordination period, for federally recognized tribal governments, is also taking place during this timeframe. The Draft Framework can be found at: http://www.epa.gov/environmentaljustice/ej2020/.

EPA has planned two conference calls to discuss the framework with interested state recognized tribes, indigenous community leaders, tribal members, or other interested indigenous stakeholders.

April 29, 2015 1:00 – 2:00 ET **Ex. 6 - Personal Privacy**

April 30, 2015 2:00 – 3:00 ET **Ex. 6 - Personal Privacy**

This outreach is being conducted in accordance with the <u>EPA Policy on Environmental Justice for Federally Recognized Tribes and Indigenous Peoples</u> (Policy). To learn more about the Policy and EPA's efforts to implement the Policy, please contact any of Agency leads for each program and

regional office for the implementation of the Policy, who are known as the EJ Tribal and Indigenous Peoples Advisors.

All indigenous peoples are also welcome to participate in any of the other public comment calls or presentations planned by EPA to obtain input on the framework. If you have any questions, please contact Charles Lee, Deputy Associate Assistant Administrator for Environmental Justice, lee.charles@epa.gov (202-564-2597). You may also reach out to your Regional or Program Point of Contact (see list on Page 5 of draft framework). Written comments are welcome. Please submit your comments by June 15 electronically to ejstrategy@epa.gov, or hardcopy to the following address:

Charles Lee, Deputy Associate Assistant Administrator for Environmental Justice

USEPA, Office of Environmental Justice

1200 Pennsylvania Avenue, NW (Mail Code 2201-A)

Dear Dan	ny:				
Thanks very much for hosting this call to solicit input on the agenda for the October 7 th consultation. As you requested, I'm emailing you my suggestion regarding the nature of panelists' contributions:					
When you invite panelists to participate in the consultation, I suggest providing them with some idea of what the USG is hoping to gain from their contributions and how it plans to use the information. The idea is to help keep the comments focused, constructive, and useful.					
climate cl	For instance, if the USG is looking for specific examples of certain effects of nange (or water, etc.) on certain human rights somewhere in the US, you could let the know that.				
•□□□□□□□□ Perhaps what you're looking for may be specific to a particular panelist. For instance, if the USG seeks to better understand what the duty of international cooperation means for the US in this context, you could invite a panelist knowledgeable about the US's obligations under international law and ask him/her to address that topic.					
One suggestion likely applicable to all panelists is to ask them to consider providing recommendations on measures the USG could take to address the issue(s) they raise (assuming the USG would take their recommendations into account).					
Please let	me know if you have any questions or seek any clarification.				
Many thanks,					

Abby

Subject: UPR Environmental Issues - Planning Conference Call - August 27, 1:00 - 2:00 ET

Greetings:

The U.S. Environmental Protection Agency invites you to participate on a call with federal agencies to discuss the agenda for the upcoming consultation relating to the U.S. Government's (USG) work on environmental issues as part of its follow up to the 2010 United Nations Universal Periodic Review (UPR). The call will take place on Wednesday, August 27, 2014, from 1 p.m. to 2:00 p.m. (ET). Please use the following information to access the call: conference phone number (Ex. 6 - Personal Privacy)

Ex. 6 - Personal Privacy

This call is part of a larger effort by the Obama Administration to engage stakeholders after the 2010 review. The UPR is a process through which the human rights record of each United Nations (UN) member is reviewed. As part of the UPR, each UN member is encouraged to engage relevant stakeholders, including non-governmental organizations, to discuss issues related to the review. The USG has held a number of meetings to engage stakeholders about a variety of issues raised during the 2010 review. The USG held a consultation on environmental issues via conference call last year on July 18, 2013.

In preparation for the USG public meeting, scheduled for October 7, at the University of California, School of Law, in Berkeley, California, we are seeking your input for the meeting agenda. The goal of this meeting is to follow up on the recommendations which the USG supported in whole or in part during the 2010 UPR, and to provide the public an additional opportunity to engage federal agencies on these issues.

Please note that individuals who plan to provide comments during the October 7 USG public meeting on UPR environmental issues will be asked to submit their comments in writing by Tuesday, September 9. Commenters will be limited to 2 minutes each in order to provide the opportunity for the maximum number of people to offer comments.

We will provide you with an agenda for the August 27 call prior to the meeting. If you have any questions or comments, you may contact me at (202) 564-2576, or

gogal,danny@epa.gov. Fo	or more information	about the UPR	process, please visit

ED_001369_00015710-00001

This call is part of a larger effort by the Obama Administration to engage stakeholders after the 2010 review. The UPR is a process through which the human rights record of each United Nations (UN) member is reviewed. As part of the UPR, each UN member is encouraged to engage relevant stakeholders, including non-governmental organizations, to discuss issues related to the review. The USG has held a number of meetings to engage stakeholders about a variety of issues raised during the 2010 review. The USG held a consultation on environmental issues via conference call last year on July 18, 2013.

In preparation for the USG public meeting, scheduled for October 7, at the University of California, School of Law, in Berkeley, California, we are seeking your input for the meeting agenda. The goal of this meeting is to follow up on the recommendations which the USG supported in whole or in part during the 2010 UPR, and to provide the public an additional opportunity to engage federal agencies on these issues.

Please note that individuals who plan to provide comments during the October 7 USG public meeting on UPR environmental issues will be asked to submit their comments in writing by Tuesday, September 9. Commenters will be limited to 2 minutes each in order to provide the opportunity for the maximum number of people to offer comments.

We will provide you with an agenda for the August 27 call prior to the meeting. If you have any questions or comments, you may contact me at (202) 564-2576, or gogal,danny@epa.gov. For more information about the UPR process, please visit http://www.state.gov/j/drl/upr/index.htm.

Sincerely,

Danny Gogal, Chair

USG Environment Work Group - UPR

Subject: Earthjustice contact for UPR stakeholder meeting

Dear Buck,

I hope this finds you well. The U.S. Government is planning a public meeting to discuss the environmental aspects of the Universal Periodic Review (UPR) conducted through the UN Human Rights Council. The environment-related recommendations the United States received through the UPR process concern climate change mitigation. I would appreciate if you would recommend one or more of your Earthjustice colleagues to whom we should address an invitation to participate.

The public meeting will be at Berkeley Law on October 7, and there will be a stakeholder

Best regards,

Hey Leslie

Hope you're well and having a good July 4th.

I'm actually on vacation this next week, but wanted to go ahead and reach out to you and see if we could set up a brief chat about the attached letter with you next week. This pipeline issue has come up with us from a few different directions, and we wanted to see if we could have a candid

conversation with you and some of your colleagues about it, but I don't know the folks on this letter so wanted to start with you.

If you are available, Stan and/or Danny, copied here, can go ahead and set up a brief chat for next week.

Thanks,

Matthew

Subject: Time-Sensitive U.S. EPA Office of Water Information and Tribal Participation

Opportunities ADDITONAL ANNOUNCEMENTS - September - October 2016

Dear Tribal Partners and EPA Regional Indian Coordinators -

The EPA Office of Water would like to share two additional announcements that are time-sensitive information on important water program events under the Clean Water Act and Safe Drinking Water Act. This information and these events may be of interest to tribes, and provides tribes an opportunity to engage with EPA on water-related topics. Please feel free to forward this information, as appropriate.

1. [NEW] EPA Seeks Input on Whether and How

to Address the Gap of Water Quality Standards Coverage in Indian Reservation Waters – 90 days after the ANPRM is published in the *Federal Register*.

On September 19, 2016, Administrator McCarthy signed an advance notice of proposed rulemaking (ANPRM) requesting public comment on the establishment of federal baseline water quality standards (WQS) under the Clean Water Act (CWA) for Indian reservation waters that currently do not have EPA-approved WQS to protect water quality. This ANPRM is one of several initiatives that recognize the importance of protecting waters on which tribes rely and its publication in the Federal Register is forthcoming.

Currently, fewer than 50 of over 300 tribes with reservation lands have WQS effective under the CWA. In advance of any potential rulemaking to address this gap of coverage, EPA invites comments for 90 days on whether to establish such federal baseline WQS for Indian reservation waters that do not yet have WQS under the CWA and, if so, what those WQS should be and how they should be implemented. Federal baseline WQS — which could include designated uses, narrative and numeric criteria, antidegradation requirements, and other WQS policies such as a mixing zone policy, a compliance schedule authorizing provision, and a WQS variance procedure — would define water quality goals for unprotected reservation waters and serve as the foundation for CWA actions to protect human health and the environment.

During the public comment period, EPA intends to hold two public webinars on the contents of the ANPRM and to provide an opportunity for interested participants to ask clarifying questions. Session details and registration information will be announced on the ANPRM website as they become available.

More information, including a pre-publication version of the ANPRM, can be found at: https://www.epa.gov/wqs-tech/advance-notice-proposed-rulemaking-federal-baseline-water-quality-standards-indian.

2. [NEW] EPA signs Memorandum for a Renewed Call to Reduce Nutrient Pollution and Support for Incremental Actions to Protect Water Quality and Public Health – Sept 22

On September 22, 2016, Joel Beauvais, Deputy Assistant Administrator for Water, signed the attached memorandum that highlights the continued, urgent need for action to reduce the threat of nutrient pollution to water quality and public health. This memorandum focuses in particular on the need for states and stakeholders to intensify their efforts in collaboration with EPA to reduce nutrient pollution nationwide. While this memorandum focused on EPA's engagement with states, it also recognizes that a number of tribes are also concerned about and working to reduce nutrient pollution (See for example, nutrient strategies posted on the National Tribal Water Council's website: https://nationaltribalwatercouncil.org/nutrient-strategies/). EPA encourages tribes to discuss appropriate next steps in their work to reduce nutrient pollution with their EPA Regional Office. The memo announces \$600,000 in technical assistance available for 5 – 10 projects proposed by states or tribes to help them and their partners advance their planning or implementation of watershed-based, multi-stakeholder projects to reduce impacts to public health from nitrates in sources of drinking water and from nitrogen and phosphorus pollution contributing to harmful algal blooms.

EPA looks forward to working in partnership with the states, tribes and stakeholders to make greater and quicker progress on reducing nitrogen and phosphorus pollution in the nation's waters. In turn, we will support a more vibrant economy and improve public health for all.

To learn more and join the conversation, please visit: https://blog.epa.gov/blog/2016/09/partnering-with-states-to-cut-nutrient-pollution/

3. [Reminder] EPA signs Final Rule—Treatment of Indian Tribes in a Similar Manner as States for Purposes of Section 303(d) of the Clean Water Act – September 16

The EPA Administrator has signed a final rule to establish a regulatory process for eligible tribes to apply to the EPA for authority to obtain TAS for the CWA Section

303(d) Impaired Water Listing and TMDL Program. The rule, "Treatment of Indian Tribes in a Similar Manner as States for Purposes of Section 303(d) of the Clean Water Act," enables eligible tribes to obtain authority to identify impaired waters on their reservations and to establish TMDLs, which serve as plans for attaining and maintaining applicable water quality standards. A prepublication version of the final rule is available at https://www.epa.gov/tmdl/final-rule-treatment-indian-tribes-similar-manner-states-purposes-section-303d-clean-water-act. Upon publication in the Federal Register, the final rule and supporting documents will be available at http://www.regulations.gov using Docket ID No. EPA-HQ-OW-2014-0622.

Prepublication of the Final Rule accessed here

Thank you,

Felicia Wright, National Tribal Program Coordinator EPA Office of Water (OW) Phone: 202-566-1886

SEP 2 2 2016

OFFICE OF WATER

MEMORANDUM

SUBJECT: Renewed Call to Action to Reduce Nutrient Pollution and Support for Incremental

Actions to Protect Water Quality and Public Health

FROM: Joel Beauvais

Deputy Assistant Administrator

TO: State Environmental Commissioners, State Water Directors

Nutrient pollution remains one of the greatest challenges to our Nation's water quality and presents a growing threat to public health and local economies – contributing to toxic harmful algal blooms, contamination of drinking water sources, and costly impacts on recreation, tourism and fisheries. Recognizing the important roles, responsibilities and authorities of all levels of government, industries, agriculture, nongovernmental organizations, academia and the public, the Office of Water will continue to foster and support partnerships and collaboration which are critical to making sustained progress on reducing this significant threat to water quality and public health.

Five years ago, the Office of Water issued a national call to action and a framework for collaboration to address the substantial and growing threat of nutrient pollution to America's water resources. Since then, the EPA has partnered with states and collaborated with other federal agencies and stakeholders to reduce nitrogen and phosphorus loadings to our nation's waters. While many entities have taken meaningful actions to reduce nutrient pollution, there continues to be a pressing need for concerted action to reduce nutrient pollution nationwide.

This memorandum highlights the continued need for action to address this challenge, calls upon states and stakeholders to intensify their efforts in collaboration with EPA, and announces support for state planning or implementation of watershed-based, multi-stakeholder projects to reduce impacts to public health from nitrates in sources of drinking water and from nitrogen and phosphorus pollution contributing to harmful algal blooms.

¹ See "Working in Partnership with States to Address Phosphorus and Nitrogen Pollution through Use of a Framework for State Nutrient Reductions" https://www.epa.gov/sites/production/files/documents/memo_nitrogen_framework.pdf

Recent Examples of the Continuing Problem

There is an emerging body of evidence that documents threats to public health as well as continued findings of high levels of impacts to the ecological health of our nation's waters from nutrient pollution:

- Nutrient pollution contributes to an increasing trend in observed harmful algal blooms in surface waters that can release toxins that pose risks to human health. In 2014, 400,000 residents of Toledo, Ohio lost their public drinking water for three days due to algal toxins in the city's drinking water. In 2015, a 650-mile bloom on the Ohio River threatened drinking water treatment systems. In early 2016, the City of Ingleside Texas issued a 13-day do-not-drink advisory for cyanotoxins in their drinking water. This year, algal blooms have occurred from Alaska to Florida, closing beaches and affecting tourism and local economies, including a state of emergency declaration in four coastal counties in Florida. The State of Utah recently allocated \$1 million to respond to harmful algal blooms in Utah Lake, the third largest lake in the state, which closed beaches and marinas and led to irrigation water restrictions.² As of mid-August 2016, states have reported more than 250 health advisories due to harmful algal blooms this year.
- Nitrogen contamination of sources of drinking water can lead to high levels of nitrate in drinking water that are dangerous for infants. In 2015, 183 community water systems exceeded allowable levels of nitrate in drinking water. High levels of nitrates in Des Moines, Iowa's drinking water supply caused the city to install a \$4 million treatment plant in 1993, with recent plans for a new, multi-million dollar treatment plant for nitrates. Nitrate drinking water advisories in Columbus, Ohio, over a two-week period in 2015 and for one week this year, have led the community to build a \$35 million treatment facility. The Wisconsin Department of Natural Resources is responding to widespread nitrate contamination of groundwater wells in two counties and other states also face serious challenges with nitrate contamination of groundwater. 3
- The National Aquatic Resource Surveys conducted by the EPA and state and tribal partners continue to show that nutrient pollution affects an alarming proportion of the Nation's waters. The 2012 survey of lakes found that 41 percent of the nation's lakes had high levels of phosphorus and 34 percent had high levels of nitrogen associated with harmful ecological impacts. The 2009-2010 survey of rivers and streams found that 46 percent have high levels of phosphorus and 41 percent have high levels of nitrogen.

Acknowledging concerns related to harmful algal blooms (HABs) and hypoxia, in 2014 Congress enacted the Harmful Algal Bloom and Hypoxia Research and Control Amendments Act which extended the scope of the legislation to include freshwater HABs and hypoxia. In 2015, Congress amended the Safe Drinking Water Act and directed the EPA to develop a strategic plan for assessing and managing risks associated with algal toxins in drinking water provided by public water systems. EPA's strategy identified source water protection (SWP) as a proactive and often cost-effective option to reducing contamination that would otherwise need to be removed by new or enhanced drinking water treatment technologies. While recognizing that factors like vertical stratification and water temperature may

⁴ https://www.congress.gov/113/plaws/publ124/PLAW-113publ124.pdf

⁵ https://www.congress.gov/114/plaws/publ45/PLAW-114publ45.pdf

impact HABs, the strategy notes that addressing nutrient loading is the most immediate, controllable risk factor.⁶

Keeping the Focus on Nutrient Reductions from All Sources

As the EPA underscored in its 2011 strategy, many of the most effective tools for addressing such pollution – including watershed and partnership approaches to protect source water through actions that address both nonpoint and point sources – are held by state and local governments. In the face of continuing public health impacts from excess nutrients, we ask that states and stakeholders, in collaboration with EPA, intensify efforts to take continued and concerted action to address nutrient pollution.

To help advance these efforts, the EPA Office of Water will:

- continue our support to states, territories and tribes through our "base" grant and technical assistance programs;
- make \$600,000 in additional FY 16 resources available for technical support, focused on incremental actions to reduce threats to public health from nitrates in sources of drinking water and from nitrogen and phosphorus pollution contributing to harmful algal blooms; and
- work with states through our Regional Offices to identify high-priority actions that each state
 intends to take to reduce nutrient pollution and then work together to assess progress and
 continue to hold ourselves accountable for achieving results.⁷

Key elements of the EPA's plans for working with partners and stakeholders over the next several years include the following priorities:

Prioritizing Watersheds and Setting Load Reduction Goals

Primarily through our "base" program grants to state water pollution control agencies, the EPA will continue to support states as they develop and implement nutrient reduction frameworks and strategies, including the 12 states that are members of the Mississippi River/Gulf of Mexico Watershed Nutrient (Hypoxia) Task Force. The eight elements of the nutrient load reduction framework outlined in the 2011 Memorandum continue to represent the minimum building blocks for an effective program to manage nitrogen and phosphorus pollution. We recognize that states may not combine all these elements into one document. In whatever form a framework or strategy takes, what remains important is that each state work expeditiously to:

- prioritize watersheds for nutrient load reduction;
- set challenging yet realistic load-reduction goals that improve water quality;
- reduce point and nonpoint sources of nutrient loads;
- provide for accountability and public reporting in its nutrient load reduction program; and

⁶ https://www.epa.gov/sites/production/files/2015-11/documents/algal-risk-assessment-strategic-plan-2015.pdf

⁷ While this memorandum focuses on EPA's engagement with states, EPA recognizes that a number of tribes are also concerned about and working to reduce nutrient pollution (see, e.g., https://nationaltribalwatercouncil.org/nutrient-strategies/). EPA encourages tribes to discuss appropriate next steps in their work to reduce nutrient pollution with their EPA Regional Office.
